LETTER OF TRANSMITTAL

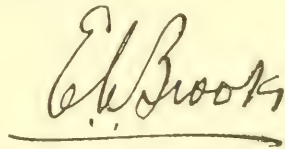

STATE OF NORTH CAROLINA.
DEPARTMENT OF PUBLIC INSTRUCTION.
RALEIGH, N. C.

To His Excellency,
GOVERNOR CAMERON MORRISON,
Raleigh, N. C.

I am submitting to you in accordance with law a report of the administration and operation of the State public school system, for the biennial period including the years 1920-21, and 1921-22.

I have endeavored to include in Part I a rather full description of the State system of public schools and how they are operated and maintained. In Part II is presented the statistical report, given in detail by counties and special charter districts, including the State appropriations and the State loans.

Respectfully submitted,

A handwritten signature in dark ink, reading "E. H. Brooks". The signature is written in a cursive style with a horizontal line underneath the name.

State Superintendent Public Instruction.

PART I

A State System of Public Schools

I

BUILDING A STATE SYSTEM OF PUBLIC SCHOOLS

In building a system of public schools three factors are absolutely essential: (1) The purpose, or what is the aim of the promoters; (2) effective organization, or what machinery is set up in order to make it possible to accomplish the purpose; and (3) the cost, or how is the revenue derived and expended.

The framers of our Constitution, in providing that every county shall maintain at least a six months school term, had unquestionably the aim that the minimum to be accomplished through a State system of schools is to afford every child the opportunity of securing at least the instruments of knowledge—that is the skill to read and write and use numbers. And this is about all that we can expect from a school system conducted for only six months out of twelve. The reading and writing on an average will barely rise above that of a third grade child. But the constant use of numbers in daily affairs will probably cause the skill in the art of using numbers to rise somewhat higher.

About 30 per cent of the white children of the rural districts have only a six months term. The remainder of the country districts have as a rule between seven and eight months, and all of the towns and cities as a rule have from eight to nine months school term. The average for the State is over 140 days or seven months. The term for the Negroes is a few days less.

It is not difficult to conceive that the purpose and ideals of the people who voluntarily levy taxes on themselves for better schools are higher than those of our backward counties that reluctantly patronize the minimum term of 120 days. We find in the former a finer conception of life and the purpose of living. The people desire better homes and more culture in them. They choose healthier modes of living and for their children a better physical growth. They realize the importance of training in the vocations such as the high school can give. They seek to exalt the amusements of young people and give direction to their recreation in order to create a better social life. They believe that intelligence and character are the basis upon which good citizenship is founded. They have faith in these things and believe that the school is the agency to coöperate with the home and the church in realizing their aim. Therefore, they voluntarily levy extra taxes on themselves in order that they may secure these benefits for themselves and their posterity.

Then how is the public school system organized and equipped so as to accomplish so far as possible the purpose of the people?

The State system of public schools consists as a rule of eleven years or grades of work based on a school term of at least eight months or 160 days. A large number run nine months or 180 days. If the school term is 120

days the pupils will accomplish in one year only a part of what children accomplish in the schools of 160 and 180 days. Therefore, instead of completing the elementary school in seven years, pupils require so much longer time that very few remain in school long enough to pass up into the high school.

The first seven years or grades are usually styled the elementary school and the last four years or grades are called the high school. For convenience in administration and instruction, certain city schools are divided into three parts. The first five or six grades are called the elementary school and the last six or five grades are divided into two parts and called the junior and senior high schools. Moreover, in many of our rural districts only two or three years of high school work are permitted because of the small number of teachers employed. And these are likewise called junior high schools. The equipment of the schools will be discussed under the head of "Planning and Locating School Buildings" and "Building Community High Schools."

The State Board of Education and the State Superintendent of Public Instruction were created by the Constitution to have general supervision of the system, and to enforce the acts of the General Assembly which is directed to plan for a "general and uniform system of public schools," and the Supreme Court interprets this to mean a general and uniform system of public schools under State supervision, having the county, not the district, as the local administrative unit. The counties are required to raise, together with what the State supplies, the necessary funds to provide the minimum term of six months. The county commissioners are commanded by the Constitution to provide the funds, and, if they fail, they are liable to indictment. All other county school officials, the county board of education, the county superintendent and the district committeemen are created by the General Assembly, and either or all of them may be abolished at any time.

The duties of the State and the county officials are prescribed by the General Assembly. There has been much confusion in the minds of many people as to just what are the duties of each. The school laws, therefore, should be codified and the duties of each clearly set forth. Such a codification is now under way and will be presented to the next General Assembly. A detailed account of the administration of the schools will appear elsewhere in this report.

But what is the cost of the State public school system and how is it financed? The General Assembly has enacted that each county must levy a rate sufficient to provide a six months school term. In May, each county board of education prepares a budget setting forth the amount needed for administration, teachers' salaries, operating expenses and buildings. When the budget is complete it is submitted to the county commissioners, and if they approve it the tax is levied at once. If they disapprove it and the two boards cannot agree the county board of education is directed to bring a mandamus against the commissioners to compel them to levy taxes sufficient to run the schools six months and the court decides the issue. After a maximum rate designated by the General Assembly is levied for teachers' salaries, if the amount derived from the tax authorized to be levied is insufficient for this purpose, the State Board of Education appropriates from an equalizing fund an amount to help pay the salaries of teachers for six months. All other school expenses are borne by the counties.

In all counties that have provided local taxation to enable a part or all of the county to extend the term beyond six months, the county boards handle the finances of each district in the same way as that described above with this difference—the State gives no assistance except in aiding the counties to maintain high schools in the rural districts, and the district committee has some voice in determining the size of the special tax rates. A few special districts chartered by the General Assembly, such as the city schools, have exclusive control of the special local tax funds, subject to certain State regulations.

The Equalizing Fund, the erection of school buildings, the salaries and the improvement of teachers are discussed more in detail elsewhere in this report. A complete financial statement will appear in the statistical report.

The May budget is merely an estimate of the cost. After the schools open the counties are required to submit a corrected budget to the State Department of Education, setting forth the actual salaries of teachers and the cost of maintaining the schools. This is prepared in November, and hence called the November budget. The State Department checks this budget district by district in order to see that the law is observed as to the number of teachers and supervisors employed and the salaries paid. Then the Equalizing Fund is paid on the approved November budget. The total cost of maintaining the schools for the year 1921-22 was approximately \$20,000,000. The exact cost will be given in detail in the statistical report. At the end of the school year each county or city system is required to have an audit made setting forth the revenue and the expenditures on forms provided by the State Superintendent of Public Instruction.

II

THE STATE EQUALIZING FUND AND COUNTY TAX RATES

It is the duty of the State to make as nearly equal as possible the financial burden of supporting the public school system in all the counties. This principle was incorporated in the Constitution which provides for "a general and uniform" State system of schools. For several years the General Assembly has set apart a fund known as the State Equalizing Fund, which has been expended in equalizing the burden of supporting the minimum constitutional term of six months. But very little assistance has been given those counties having small per capita wealth, that desire to increase the school term beyond six months. It is almost as necessary to provide assistance for increasing the term beyond six months as it is to give aid in maintaining the six months term. But I shall discuss this question somewhat in detail under the subject "Building County High Schools."

The present method of distributing the State Equalizing Fund is unsatisfactory. The acts of the General Assembly specify that after the counties have levied a certain uniform rate, if the amount derived from this rate in any county is insufficient to maintain the schools for six months, the remainder may be drawn from the State Equalizing Fund. This would be a fair basis if the State had such supervision over the valuation of property in the several counties as to make it possible to equalize property values. There are serious differences of opinion among the leaders of the State on this question. The General Assembly of 1921 inaugurated a greatly improved tax system whereby the State levies no ad valorem tax on property but derives all of its increase from inheritances, franchises, incomes, etc. The ad valorem tax on property is left entirely to the counties. Therefore, there is no impelling reason why the State should enter a county and assess the valuation of property since it levies no ad valorem tax.

The special session of the General Assembly of 1921 limited the amount of the Equalizing Fund to \$32,250.00, plus any balance from other public school funds. This was necessary because the progress made by the counties created a demand for \$710,000 more than the State had set apart for the year 1920-21. After making provision for paying this amount the General Assembly readjusted the tax rates and fixed a maximum amount for which the State would be liable. Forty-six counties in 1920-21 received aid from this fund. The General Assembly of 1921 changed the method of apportioning this fund and in 1921-22 sixty-three counties received aid.

In making provision for the six months school term, the distribution of the State Equalizing Fund has heretofore depended in a large measure upon the valuation of property in the several counties. Changes in property values due to natural causes, or to the arbitrary action of public officials, has caused the amount of the Equalizing Fund appropriated to individual counties to vary considerably. It is very desirable, therefore, since the State

levies no ad valorem tax and since it is disposed to leave the determination of the values of the property of the several counties to the local officials, reserving only a supervising relationship to it, that the Equalizing Fund shall be apportioned on such a basis as to make it impossible for reductions in property values in a county, except from extraordinary causes, to affect the amount to be apportioned from the State. In other words, we should divorce the State Equalizing Fund so far as possible from the revaluation of property. This can be done if we will determine, in advance of the levying of taxes and the opening of schools, the amount of money that shall be apportioned from the State to the several counties.

If the State Board of Education is authorized to determine the amount due each county by June 1st of each year and to certify this amount to each county before the taxes for the year are levied, then the law may require the county commissioners to levy a tax sufficient to produce the remainder necessary. If this is authorized then no rate will be specified in the law. The method of determining how much shall be apportioned from the Equalizing Fund to each county can be worked out by a rule that will be fair and reasonable. The counties can then know in advance how much to expect from the State, and the tax rate will be determined by local officials in accordance with needs. The change in property values may affect the rate levied but not the amount of funds to be raised.

We have had great difficulties every year since the schools were reorganized in 1919 in making the Equalizing Fund meet the needs of the counties that really deserved assistance. After the revaluation of 1920, the General Assembly of 1921 fixed a definite rate of 30 cents for each county to levy before it could draw from the Equalizing Fund. At the same time the counties were authorized to revise the values of 1920. All but about 30 counties made considerable reduction in values. None made an increase in values. As a result, the Equalizing Fund calculated on the basis of a 30 cent rate on 1920 values would have been totally inadequate if no county had levied more than a 30 cent rate. We advised the counties to levy a rate that would produce a sum equal to the amount that would be raised by levying 30 cents on 1920 values. As soon as possible the rule was tested in the courts. The first case was heard in Nash County. The court held that the rule was fair and the State Board of Education made it the rule for distributing the Equalizing Fund for 1921-22, and 1922-23. But it will be necessary for the General Assembly of 1923 to adopt some other method of distributing this fund, and a method will be presented to the General Assembly which I believe will divorce the Equalizing Fund from the revaluation of property and at the same time relieve State officials of that very irritating problem of entering a county and assessing its property values. But the State should, in my judgment, continue to have reasonable supervision of these assessments.

But what shall be the size of the State Equalizing Fund? The burden on the several counties of supporting the schools will be equal if the State levied one rate sufficient to run all the schools of the State and disbursed the funds from the State Treasury. Many are advocating today this method of financing the schools. If the State should levy such a tax it would be a State tax. But under the Constitution the State is prohibited, so it seems,

from levying more than 5 cents. Therefore, this method of financing the schools is impossible. But in determining the size of the Equalizing Fund that shall be apportioned from the State Treasury we may calculate what rate on a relatively fair valuation of property would be sufficient to provide a six months school term in every county of the State. Having that as our basis, it would be easy to calculate how many counties could not run their schools six months on this rate. The difference between what that rate would produce and the amount necessary to run the schools six months would be the amount of the Equalizing Fund due that county. In this way the total amount for all the counties can be easily determined, and this will give us an idea of the size of the Equalizing Fund for 1923-24. If this policy should be adopted by the General Assembly it is very apparent that the amount of the Equalizing Fund will be approximately \$1,250,000. If it is made less than this amount the county rates will go up accordingly. If it is made more than this amount the county rates will go down accordingly. Having determined the amount of the Equalizing Fund, and having adopted a fair method of distributing it that will divorce the administration of schools from the question of the revaluation of property, we shall be able to continue our educational progress with less friction in our dealings with local officials and better relationship will be effected between county officials and the State Department of Education.

III

THE COUNTY UNIT OF ADMINISTRATION

We are developing a State system of public schools with the county as the unit of administration. This was the purpose of the framers of the Constitution, and the decisions of the Supreme Court in recent years have so directed our tendencies that legislation to be successful must be in harmony with the county unit idea.

The county unit of administration has a distinct advantage over the district system. It makes it possible for the county board of education to locate buildings advantageously and economically. High schools may be established according to the needs of the whole county, and the per capita cost of instructing high school pupils may be materially reduced by proper organization. Large school units will bind small districts together and encourage coöperation, thereby breaking up the clannishness of the people that has had a tendency to perpetuate the tribal age. Large community schools create a more wholesome social life among the young people and have a tendency to raise the culture level of all the people. In these stronger schools vocational subjects may be introduced and the teachers of these subjects may extend their instruction to all the adults of the county. If the schools are rightly located and organized, better instruction in health and hygiene may be carried to the people.

All these distinct advantages may be derived from a county system of schools intelligently planned and efficiently directed, without increasing the per capita cost of instruction beyond what it would cost to instruct the same children in small districts.

For nearly a quarter of a century after our school system began to take shape there was a tendency for the county to break up into small districts. A number of such districts were chartered by the General Assembly and made independent of the county authorities. A still larger number was authorized to vote special taxes to supplement the county school term. Only in this way could they have good school facilities a generation ago. The principals or superintendents of these local tax or special charter schools being in many instances professionally superior to the county superintendent, developed their district schools into independent units, while the county as a whole had a distressingly poor system of schools without unity and with poor supervision for the most part.

Within the past decade, however, the decisions of our courts and legislative acts have had a tendency to make the county the unit and bring all the small local tax or special charter districts under county control. This has given the county boards of education very broad powers, as a codification of all the school laws will show. The chief executive school officer of a county is the superintendent. He likewise has very broad powers, but his duties are little understood by the average citizen of the State. However, the suc-

cess of the county system depends more upon the superintendent than upon all other officials. In the first place he must be a good business manager, or the county will actually waste much of the public funds. In 1900 we were spending less than \$1,000,000 annually for public education. We are spending for the year 1922-23 about \$20,000,000. If we compare the expenditure of \$10,000 annually per county with \$200,000 annually per county, we shall have some idea of the great change that has taken place within a period of twenty-two years and of the increased responsibility attached to the office of county superintendent.

A study of the per capita cost of instructing the children in the several counties discloses the fact that, as a rule, the more highly trained county superintendent employs better teachers and secures the instruction of the pupils at a less per capita cost than does the less skillfully trained superintendent who employs an inferior grade of teachers.

There are a number of well informed people today who in their private business would secure the best expert advice in the spending of as large sums of money as the average county superintendent spends today. But they are unable to see the need of securing the best expert advice in spending this sum for the education of the children. A poor superintendent can waste more of the \$200,000 to be spent by him in one year than his predecessor twenty years ago had to spend, and the taxpayers as they go about their daily affairs may not know that their money is being wasted. How may a competent superintendent practice economy in the expenditure of public funds?

1. By using good judgment in properly locating school buildings and in so planning them that they may be of most service to the people. It is well known that a good business man can secure better results in spending money for the erection of a business building than can an inefficient man. This is especially true in the erection of school buildings.

2. By organizing the schools so as to secure the instruction of a larger number of pupils at a reasonable per capita cost without reducing the efficiency of the schools. A good superintendent who knows how to organize his schools and to group his teachers can secure good instruction at a less per capita cost than can a poor superintendent.

3. By using good judgment in selecting teachers. Superintendents in the past have spent money unwisely because they have not been skillful in this respect and they have cost their counties many times the salaries paid them. A good superintendent who is careful in selecting teachers, in measuring their qualifications, and in the application of the salary schedule may economize considerably at this point, and at the same time improve the character of the instruction.

4. By providing professional training and the possibilities for the advancement of ambitious teachers. The moving teacher is more expensive than one who remains in the community and grows as the school grows. Wherever teachers remain only a year and then move on the loss to the pupils is great and the effect on the community is bad. Many teachers holding the high certificates and drawing the highest salaries may do inferior work because they have poor direction from the superintendent's office.

5. By safe-guarding the school revenues. A number of counties have gone into debt because no one seemed to know how much of the revenues belonged to the school fund and how much to the general county fund. We have a large number of superintendents in the State who are skillful in keeping the school finances separate from the general county fund and are able to give substantial aid to county authorities. Being good business managers, they know what the school funds should be and how to plan the program for the year.

The business of the average county is becoming too great and too complex for one man. If he is a good business manager, he cannot give the necessary attention to the character of the instruction in the school room. As a result, nineteen counties have seen the wisdom of employing professional assistants, known as supervisors. They are under the direction of the county superintendent but they work with the teachers, giving them needed assistance in organizing classes and instructing children. This is necessary if the greatest returns possible are derived from the expenditure of public funds.

A skillful business man, preparing to erect a building costing \$200,000, will employ the best architect obtainable, paying him at least 5 per cent of the total cost for expert supervision. In addition to this he will employ a contractor and pay at least 5 per cent for his supervision, and he knows that such supervision is necessary. The same good business judgment should be used in spending \$200,000 in the education of the children. However, officials in a few of our counties feel that they are economizing when they employ a superintendent for \$1,200 or \$1,500, and allow no office help and no professional assistance. People then wonder why the schools are poor. They would not wonder that a building costing \$200,000 was unsafe as well as unsatisfactory if they knew that in order to save a few thousand dollars, no architect, no contractor, and not even the owner had any supervision whatever of the construction of the building, but allowed the workmen to do as they pleased. A well organized county system of schools will demand a competent county superintendent and a professional assistant who supervises the schools during the school term.

The records in the office of the Superintendent of Public Instruction show that a well organized system of schools on the county unit plan, having both a superintendent and a professional assistant, can be maintained at a lower per capita cost per pupil than can a poorly organized system of schools on the independent district plan. The six months term is now under the county unit plan if we omit a few larger cities that operate under a special charter. But all special tax districts should conform to a general county plan in order that the whole county may go forward. Wherever we have good supervision the tendency toward the county unit is very marked. But wherever it is poor the tendency is always toward the district as the unit because the superintendent is without sufficient leadership to give assurance that the district will be improved if it becomes an active part of the county system. The small local tax districts detached from the county system are today in many counties a hindrance to the general educational progress. This is true because they have secured to themselves all the corporate wealth of the county, and, seeing poor leadership in county affairs they hesitate to become a part of the county unit. As a result, there are outlying backward

districts having little taxable wealth that are a charge on the State and the county. They not only increase the per capita cost of instructing the children of the county, but they stand in the way of a better organization of the schools and the general tendency is for county officials to neglect them. The defect is not in the district but in the county administration.

The most expensive part of a county school system is an inefficient county superintendent, and it is tragic to see the children of a county seeking an education while the administration flounders hopelessly in an attempt to spend the people's money wisely. The efficiency of the county superintendent, however, has improved greatly within the past three years. This improvement is one of the most noticeable features of our educational progress. A large majority of the counties have very competent men who are rendering exceptionally fine service. And any action that would tend to reduce the salary of superintendents below the level of the living of a competent man would work untold harm, since it would weaken the county administration and emphasize the importance of the little independent local districts, which are without proper guidance because their funds are too limited to permit them to employ expert supervision and the county is unable to give them the needed supervision.

The city schools have in the past secured the best executives because they were at liberty to go out into the world and employ the best skill. But many people have a notion that a county superintendent need not be skillful. The administrator of a county system requires more skill, as a rule, than does the administrator of a city school system. A good man in either capacity will demand a living wage, but a poor man will take the superintendency at any price, and one poor man may waste an amount in one year that would maintain a good man on a high salary for at least five years. It will not be difficult to prove this. I am not arguing for higher salaries, but I am insisting that county boards of education should be encouraged at all times to secure the best men possible, and having selected them they should maintain them. The public school fund is increasing at a rapid rate. The people are demanding better schools. Teachers are improving at a satisfactory rate, and the one executive that can give the right direction to this progress is the county superintendent.

IV

PLANNING AND LOCATING SCHOOL BUILDINGS

The counties for the first time in our history are in a fair way to erect suitable school buildings for all the children. The cities and towns have a fine enthusiasm for providing better buildings and they have voted bond issues amounting to nearly \$15,000,000 during the past two years. The counties are providing large brick buildings with auditoriums for the rural consolidated schools. This has been made possible through the aid of the Special Building Fund authorized by the last General Assembly. This fund amounts to \$5,000,000, and is loaned to the counties for a period of twenty years, the counties repaying one-twentieth of the principal and the accrued interest annually. The entire building program under construction at this time is estimated to cost, when completed, about \$25,000,000.

The idea of a State loan fund for aiding the counties in erecting school buildings is not new. In 1903 the General Assembly very wisely set aside the State Literary Fund, then amounting to about \$200,000, to be used as a loan fund for building school houses. This amount has been increased as the State has sold its public lands and by legislative appropriation until today it amounts to \$1,028,117.00, which is now loaned at 4 per cent interest to one hundred counties in the State on a ten-year basis. One-tenth together with the accrued interest is repaid and reloaned, making about \$150,000 annually which the State may loan from this fund. But this has been totally inadequate. The counties had only one other alternative—local bond issues. But this required a vote of the people. As a result, the strong wealthy centers could secure bond issues by levying a reasonably low tax rate, while the more backward districts, in many instances, if they were in favor of education, could not secure a bond issue of sufficient size to provide the necessary buildings without levying a tax rate that would be almost prohibitive. Since the wealthier centers were already bonding themselves, they were not enthusiastic about assuming additional burdens in order to help the more backward districts which were little in favor of education anyway. As a result, the counties had a tendency to break up into district schools and the rural sections for the most part were being neglected.

The General Assembly of 1921, however, made it possible for the counties to secure funds to erect buildings in the rural districts and this paved the way for a county unit system that will make better schools possible for all the children of the county. This was done, as was said above, by creating "A Special Building Fund," of five million dollars. The State was authorized to sell bonds amounting to this sum and loan the proceeds to the counties. In June following the act of the General Assembly, the State Board of Education adopted the following rules governing the loans:

1. The Special Building Fund will be loaned to counties on a pro-rata basis. That is, each county will be entitled to borrow the same per cent of

the Special Building Fund that the school population of the county bears to the school population of the State.

2. If the entire amount is not borrowed on this basis the remainder will be loaned to counties in accordance with their needs.

3. Counties may make application at once for loans from this fund on blanks to be supplied by the Superintendent of Public Instruction.

4. Counties are at liberty to begin their building program this summer with the assurance that the loan will be available on January 1, 1922, provided the bonds are sold. If the bond market next December is not such that the entire amount is made available and the counties desiring to secure loans will secure purchasers for the sum needed, this amount will be loaned to the counties in accordance with Sections 1 and 2, above.

5. No loan shall be approved by the State Department of Education until the plans for the building and the location of the same and the size of the district have been recommended by the Director of Schoolhouse Planning.

By June, 1921, applications had been received for the entire \$5,000,000. But the constitutionality of the act was questioned and the State Board of Education was estopped from making the loans until the courts could pass on its constitutionality. The decision of the Supreme Court was favorable to the State and very far-reaching in its effects. The court made it very clear that the Constitution demands a State system of schools with the county, not the district, as the local unit of administration.

At the present time \$3,300,000 have been loaned and the remainder will be as soon as the bonds are sold. The cost of the buildings aided by these loans amounts to \$9,024,635. The applications far exceeded \$5,000,000. Over \$3,000,000 of the amount already loaned have gone into small towns, villages, and rural districts that could not have secured the necessary funds otherwise for the erection of suitable buildings. The larger towns were already financing their own building programs. According to estimates received in this office, as was said above, the cost of the building program now under way will, when completed, amount to about \$25,000,000. At least half of this amount is spent in the rural districts and in the small towns and villages. But this amount will not be sufficient to complete the necessary building program and either the State should authorize another bond issue to be loaned to the counties on similar terms, or the counties under State supervision should be authorized to issue bonds. Our children cannot be educated unless school buildings are provided.

The State Department of Education through its Division of Schoolhouse Planning, has given very careful supervision of the expenditure of public funds for the erection of school houses. This division, composed of one director and one assistant, was organized in 1920 to give school officials special aid in planning and properly locating school buildings. The director and his assistant are both kept on the road constantly advising with school officials and giving them expert assistance. Much money may be wasted in the construction of school buildings, since unwise architects will sometimes plan buildings with a fancy exterior, but the floor space devoted to class room work may be less than 50 per cent of the entire floor space of the buildings. This is the most costly type of structure, and shows a waste of funds.

Good judgment exercised in planning school buildings may save millions of dollars of the people's money. Moreover, the size and arrangement of a school building may promote or hinder the progress of the children and a favorable location may have great educational influence on the life of the people. Within the past year the Director of School House Planning and his assistant have visited every county in the State, giving advice to county officials on the kind of buildings needed, how they should be planned, where they should be located, and about how much they should cost. The State has purchased from architects plans and specifications which are supplied free of cost to the counties. In this way thousands of dollars are saved annually while the types of buildings erected not only give the children a pride in their school but are a distinct ornament to the community.

In the rural districts the buildings are being located, as a rule, on the improved highways. They are attractive in appearance and are an asset to the State and the county. In the open country large grounds from six to twelve acres are being secured and play-grounds for the small children, for the intermediate grades, and for the high school students are provided. In the erection of these buildings emphasis is placed on providing suitable rooms for the teaching of home economics. Emphasis is being laid upon the teaching of agriculture also. It is mandatory that sections of the school grounds shall be set apart for a school garden, which is a sort of outdoor laboratory for the study of growing plants, soil, insects, etc., and the buildings are so constructed as to encourage the teaching of agriculture.

The old log schoolhouses and the small frame houses heretofore used are rapidly disappearing and in their places the officials are erecting in the rural districts modern brick buildings, and the people of the country have an enthusiasm for education that even the towns and cities did not have ten years ago. In place of the small poorly lighted, poorly equipped school houses may be found today eight, twelve or sixteen-room brick buildings with auditorium, located on the great highways that are now spanning the State. Here the children of the farm may secure as good instruction as the children of the towns receive. Here the patrons may meet either for pleasure to enjoy an evening entertainment provided by the schools, or to form a coöperative association that will insure them better returns for their labors. A school auditorium in the country is one of the best assets of a community. It affords an opportunity for the people to meet in large assemblies, and for the young people to have entertainments and a richer social life. As a result of this type of building, the school is becoming the community center, and more people are coöperating today than ever before in the history of the State. The small district and the small building can no longer supply the social, intellectual and industrial education that the people demand and they are realizing it. As our farms increase in resources the large community institution is a necessity. The small one-room school sends no pupils as a rule to the high school but drives the people to the town. The large country community, however, with its adequate building containing from 300 to 500 pupils, may be so organized that from 100 to 125 pupils can have the advantages of high school education. The hope of the rural community is this large type of community school. But it

is impossible for every community to have this type until the funds are available for the erection of the buildings.

In planning school buildings for our towns and cities our people are learning that the large school unit makes it possible to organize and classify the pupils on a more economical basis. The cost of supervision is reduced. The over-head expenses are less per pupil, and the pupils may be classified in such a way as to give greater elasticity to the graduation and promotion of pupils. Great economy may be preserved, the health of the children improved, and the efficiency of the school increased by a careful planning of school buildings.

V

BUILDING COMMUNITY HIGH SCHOOLS

The growth of the large type of community school having adequate buildings and grounds has been remarkable within the past three years. It is giving our country districts as good high school advantages as our towns and cities possess.

A high school cannot live in a community where the elementary schools are maintained for only six months. Such elementary schools cannot give sufficient instruction to raise pupils to the high school level and keep them in the high school long enough to complete a four year course. It requires a school term of at least eight months for both the elementary and high schools to maintain a good four year high school. Some of our rural communities are levying special local tax rates of from seventy-five cents to one dollar on the hundred dollar valuation, in addition to the county rate, in order to secure enough funds to provide two months beyond the county six months term. If these were in a county system and a special tax were levied over the entire county all the schools could be maintained for eight months with a special tax considerably lower than some individual country districts are now levying.

If the State deems it necessary to provide an Equalizing Fund to equalize the burden of supporting a six months term, it should likewise provide an Equalizing Fund to aid the counties in supporting an eight months term. The last General Assembly appropriated \$100,000 to aid in establishing high schools in the rural districts. This is really an Equalizing Fund, but it should be greatly increased.

The high school is the one institution in our rural districts that will give spirit, culture and solidarity to the people. Without it the people must look to the towns for a culture that cannot be found in the country. But a high school is impossible unless the elementary school is strong enough to send its pupils to the high school, and the small schools, as was said above, do not give sufficient instruction even to encourage the pupils to pass through the elementary grades.

The State Department of Education estimates that a good high school department offering a four-year course should have at least three teachers. Moreover, it should run at least eight months, and it should have a library of at least 300 volumes. It should also provide facilities for teaching at least two sciences. Such a high school should have an average attendance of at least 45 pupils, in order to justify the expenditure.

But the high school is merely an extension of the elementary school. We should look upon the two as one school unit. Other states call this unit a "Union School," and I think we shall have to adopt the same term because many people look upon our high school program as something separate from the elementary school.

This Union School can be secured in our rural communities only through

consolidation, but this does not necessarily mean the abolition at once of all the elementary schools in a consolidated area. The small schools in many districts should not be abolished after the consolidation is made, provided the buildings are suitable for class room instruction. Here the first three or four grades may be well taught. But eventually the people will demand that their children be sent to the central school, when they have had full time to see the results. This has been the history of consolidation in North Carolina.

It is necessary for the State to give substantial aid to this Union School in order that both elementary and high school instruction may be equal to the same class of instruction in our city schools.

In 1920 no standard high schools could be found in the rural districts of eighty-five counties, and thirty counties had no standard high schools whatever, although here and there were schools in which high school subjects were taught. It is easy to see, therefore, that the elementary instruction in these country districts must have been very poor indeed. It seems to me that it is impossible to preserve the strength of our rural communities while such neglect is tolerated. These communities vote taxes and their rates, as a rule, are as high as and sometimes higher than the rates of the towns and cities. But the per capita wealth is so small that it is impossible to derive funds sufficient from the taxes voted to provide a Union School that will afford both good elementary and high school instruction.

The General Assembly of 1921 sought to correct this defect and appropriated, as I said above, \$100,000 to be used in aiding the rural districts. Owing to the shortage in the Equalizing Fund the special session of 1921 authorized the State Board to cut down all appropriations in order to increase the size of this fund. Therefore, the State spent only \$52,440 in aiding the establishment of these schools. Forty-six schools were aided in forty-three counties. Every county that did not have a standard high school received support. As a result, by the end of the school year 1922-23, every county will have one standard school of the type outlined above, provided the plans are now carried out by the local officials. This is a tremendous gain, but we should have in the near future one such school or its equivalent, in every township in every county in the State, if we would make the rural sections strong and vigorous and contribute more largely to the progress of the State.

The growth of the high schools within the last few years, owing to consolidation, has been unprecedented. As a result of the State appropriation the number increased in one year from 166 in 1921 to 223 in 1922. With State appropriation and careful supervision we added 57 standard high schools to the State and this means also that we strengthened the elementary schools at the same time. By a continuation of this same appropriation to the schools aided last year, twenty-five other high schools will be added to the standard list because the number of pupils passing up into the high school grades will be sufficient to give the necessary enrollment for three teachers and a four year curriculum. In other words, we aided about twenty-five schools last year that will require two years' growth to reach the standard class.

Moreover, the attendance in the high schools has increased just as the number of Union Schools has increased. The enrollment in the standard schools in 1921 was 21,000, but in 1922 it was 31,000, or an increase of about 50 per cent. The total enrollment in all schools giving high school instruction, including both the standard and the non-standard schools, increased from 30,000 in 1921 to about 45,000 in 1922. Again an increase of about 50 per cent. The number of graduates of the standard schools increased from 4,239 in 1921 to 6,000 in 1922, again almost 50 per cent. But it should be remembered that this increased enrollment in the high school departments of our union and city schools would have been impossible if the elementary school departments had not been greatly improved at the same time.

The total number of schools in the State, including both the standard and the non-standard classes, giving high school instruction, is approximately 600. About 245 of these will be in the standard class by the end of this year, leaving 355 located entirely in the rural districts with little hope of becoming standard schools without State aid. The most of these could be raised to the standard grade by a little assistance, possibly an average of \$700 apiece. This would mean a total annual appropriation of approximately \$250,000. If we could have 600 standard high schools rightly distributed among the 100 counties we should be able to give adequate instruction both in the elementary and high school grades for practically all the children of the State. If we could provide the 600 schools of standard grade we should have approximately 100,000 attending high school. This would be about one-ninth of our school population. At present only about 5% of our school population is attending high school. It is certainly not too much to ask the State to make provision for at least 10% of our school population to have the advantage of high school instruction. If this is provided, we shall then be on a favorable plane with other progressive States of the Union. Every cultured progressive community is a distinct asset, and if the State by a liberal appropriation can change the ignorant backward communities into cultured progressive communities it can change a liability into an asset. It will require a few years to organize the schools so that they may become standard schools. Therefore, we could not spend \$250,000 wisely for this purpose next year. But our funds should be increased gradually until State aid to rural high schools amounts to this sum.

The State Department of Education has one supervisor of high schools who aids county superintendents in organizing and standardizing these schools. He likewise superintends the expenditure of the State appropriation. Realizing that the State is too large for one man to supervise the high schools of a hundred counties, we asked the assistance of the Departments of Education in our University, colleges, and normal schools. Eleven of these institutions responded promptly and representatives from each agreed to undertake the supervision of the high schools of a given number of counties conveniently located, and make reports to the State Supervisor of High Schools. This assistance has been very valuable and has made it possible for the State to give good supervision of the high schools, and to safe-guard the expenditure of State funds.

VI

VOCATIONAL TRAINING IN PUBLIC HIGH SCHOOLS

Our Union Schools will not be complete if we fail to make provisions for the teaching of agriculture and home economics. A school should do more than give instruction to children in the class room. It should reach the community and should carry instruction to the adults as well. It is worth while for the State to aid in creating a wholesome community life in our rural districts because as they improve, the wealth and the culture of the State increase.

The Director of Vocational Education coöperates with the Director of High Schools in order that in building a good high school we may at the same time introduce such vocational subjects as will be most beneficial to the community. This division has been made possible through an act of Congress passed in 1917, appropriating funds to North Carolina, as well as to the other States in the Union, for the encouragement of the teaching of agriculture, home economics, and trades and industries. The appropriations from the Federal Government are as follows:

1919-20.....	\$ 67,452
1920-21.....	81,306
1921-22.....	98,331
1922-23.....	110,668
1923-24.....	123,005
1924-25.....	147,680
1925-26.....	172,354

These funds are appropriated on condition that the State spends a like amount. The total amount spent from State and Federal sources for the biennial period just closed is as follows:

1920-21.....	\$171,474.31
1921-22.....	204,104.99

(These figures include appropriations for vocational rehabilitation of persons injured in industries and otherwise.)

The Federal appropriation for vocational education for 1923-24 will be \$123,005, and for 1924-25, \$147,680. The State will be required to duplicate these amounts. But, as our reports show, the combined State and Federal appropriations do not meet the demands of the people. Hundreds of schools would introduce at once the subjects of agriculture and home economics if we could give assistance. Our appropriation from the State for vocational education should be at least \$200,000 annually. This amount alone is needed in those counties that are threatened by the boll-weevil. The amount spent in 1921-22 is divided as follows:

Salary and Expenses of Director.....	\$ 4,061.16
Teacher Training	30,441.51
Supervision and Traveling Expenses.....	16,828.73
Salaries of Teachers of Agriculture.....	91,808.09
Salaries of Teachers of Agriculture.....	91,809.09
Home Economics, Teachers	39,187.79
Teachers of Trades and Industries.....	12,591.76
Vocational Rehabilitation	9,184.95
Total	\$204,104.99

The following table shows the development of the work in agriculture for four years:

<i>Day Schools</i>	1918-19	1919-20	1920-21	1921-22
Number Schools	21	44	53	65
Number Teachers	21	44	53	68
Number Classes	35	70	97	125
Enrollment	323	721	1,019	1,468
<i>Part Time Classes for Adults</i>				
Number Schools			22	56
Number Classes			26	63
Enrollment			644	2,100

It will be observed that during the past year there were 65 public schools representing 49 counties in which vocational agriculture was taught. In addition to his class room instruction each boy taking vocational agriculture was required to apply this instruction in the growing of crops or animals, as a part of the course, and keep an accurate record of results.

There were approximately 2,000 adult farmers who received instruction, in addition to the high school students, along the lines that helped them with the immediate solution of their farm problems. The teacher of agriculture is expected to study his community needs and if the farmers desire definite instruction, he should organize them into classes and either teach them himself or secure someone to teach them. As an illustration of the type of work conducted in part-time classes, in Sampson County twenty-five farmers met at the school house from time to time to study the best methods of growing cotton under boll weevil conditions. They secured improved cotton seed, which were distributed among them, and during the fall special meetings with the assistance of an expert were held in the field for the purpose of selecting the best types of stalks by careful field selection. Other groups have studied orchard production, fertilizers, hog raising, marketing, dairying, etc.

As a typical part-time course in live-stock instruction, W. D. Barbee, teacher of agriculture and principal of the Seaboard High School, organized a class of adult farmers to whom he gave a course in hog raising, involving the care and feeding, and the proper methods of hardening the pork and marketing. A group of farmers was induced to feed a car load of hogs according to instructions, and to market them at the times statistics showed the price of live hogs was at its highest point. These farmers were carefully instructed and supervised by Mr. Barbee and specialists from the Extension Division of the State College and Department of Agriculture. At the time appointed, the hogs were shipped to the Richmond market and sold

for more than 11 cents a pound live weight when dressed pork was selling at 10 cents a pound in the community. As a result of this demonstration, the farmers of this section have become interested in growing hogs for the market, and because of the fact that it is a peanut and soy bean community, there is every reason for hog raising to become one of the most profitable farm enterprises of that section of the State.

The following table shows the development of work in Home Economics during the past four years:

<i>Day Schools</i>	1918-19	1919-20	1920-21	1921-22
Number Schools	3	23	55	53
Number Teachers	4	25	58	55
Number Classes	7	40	80	84
Enrollment	100	814	1,650	1,940

Evening Classes for Adults

Number Schools	20	33	27
Number Classes	20	33	27
Enrollment	323	595	565

In the field of home economics, 80 schools and classes have been conducted for girls and women, dealing with all the immediate problems of housekeeping and homemaking under the instruction of highly trained and well supervised teachers. The problems of most interest that have claimed the attention of these groups are such things as the selection, preparation, and serving of food, the selection of material and making of suitable clothing for the family, care and furnishing of the home, care and feeding of infants, budgeting the family income, etc. Some extremely interesting classes have been conducted for the mature women of various communities in such things as millinery, cooking, sewing, home nursing, etc. The instruction given in this division is extremely practical and has become so popular that the funds available are not at all sufficient to meet the demand for this training. There were fewer schools and classes in 1921-22 than in 1920-21 because the better trained teachers required higher salaries and the funds were not increased.

The following table shows the growth of work in Trade and Industrial Education during the past four years:

<i>Evening Classes for Adults</i>	1918-19	1919-20	1920-21	1921-22
Number Classes	5	73	163	180
Number Teachers	5	50	96	100
Enrollment	128	751	1,511	2,103

Part-Time Classes

Number Teachers	2	4	5
Number Classes	2	4	6
Enrollment	31	153	407

In the trade and industrial field, special attention has been given to the evening class instruction for employed workers where training related to their employment was given so that these men could become more effective workers and thus happier citizens. Twenty-five hundred working men and women, boys and girls, took advantage of this instruction in the

evening and part-time classes conducted in coöperation with the State Board during the year closing June 30, 1922. Work related to the cotton mill industry, of course, received greatest encouragement for the reason that it is North Carolina's largest industrial activity. However, there were a number of classes in such things as paper and pulp manufacturing, carpentry, plumbing, blue-print reading, auto mechanics, and other trade subjects.

These classes are taught in the most convenient and suitable places for the workers and usually the teacher is a tradesman selected because of his unusual knowledge of the subject and his leadership among his fellow-workers.

Young people, who have stopped school before completing the school courses, may have special classes provided for them, and such high school courses have been organized in several North Carolina cities, thus enabling young men and women of ambition to return to school a few hours each week when they can best be spared from their work. One young man in Durham was willing to give up \$75.00 a month, one-half of his salary, to go back to school. Classes in retail salesmanship have been conducted in Asheville and Charlotte with splendid results.

In addition to this, the work in industrial rehabilitation, recently organized, has enabled the department to get in touch with and aid more than 100 disabled persons scattered throughout the State, who otherwise would have become dependents and liabilities upon State and society. Numbers of these injured civilians have received special training which equipped them to fill positions suitable to men with their disabilities; in other cases it only needed the assistance of the department to help the injured person to secure employment in a position where his disability did not too seriously handicap him, and others have been helped to secure artificial appliances which enabled them to earn a living. Twenty of these persons have been returned to society rehabilitated and are now earning from \$25.00 to \$100 per month and are happy, self-supporting citizens. The State is making no investment which will return larger dividends than its investment in the aiding of these disabled persons.

The following incident taken from the *News and Observer* of May 6, 1922, indicates how this department reaches the needy:

Claud R. Cox, of Yadkin County, was orphaned at three years of age. Soon afterward he contracted septic fever which resulted in ankylosis of both knees and left hip. He had reached the age of twenty-six when found by the Department and was only able to do such jobs around an humble home as carrying wood and water. He expressed a desire to learn linotype operation. A place in a printing house in Winston-Salem was secured where he could learn the trade. At the end of twenty weeks, he was able to operate a machine, and was put on the pay roll at \$15.00 a week. He is at present working at his trade in another town at \$25.00 per week, with good chance of promotion."

VII

PROGRESS IN HIGHER EDUCATION

Progress made in higher education during the past decade has been remarkable. The Director of Teacher Training has prepared a bulletin setting forth the status of higher education for the year 1920-21. This is the first time that a complete study of our University, colleges and normal schools for both races has been published. The property valuation of these institutions, including those supported by the State as well as those supported by private foundations, is perhaps greater than the casual reader would suspect. The combined capital invested in buildings, grounds and equipment reaches a total of \$15,418,834. These figures, of course, were secured before the bond issues authorized by the General Assembly of 1921 had been spent. The invested funds represent an outlay of \$5,528,240. This makes the total financial resources of these institutions \$20,947,074. In the year 1920-21 the current expenditures amounted to \$4,375,285. In the same year 686 professors and instructors were employed and 7,778 students of college grade were in attendance. The General Assembly of 1921 realized the necessity of enlarging the State supported institutions and appropriated \$4,120,000 for permanent improvements and \$1,282,000 for maintenance.

When the State Department of Education began the reorganization of the public schools in 1919-20, the higher institutions were requested to aid this Department in erecting some standard by which they would be willing to be judged. In other words, the question to be decided was—what is a standard college? At once these institutions gave their assistance and they unanimously adopted certain standards, making it very easy for the State Department of Education to measure the value of the certificates issued on the basis of college credits. No more patriotic service has been rendered and no more helpful assistance has been given the State by any group of educational workers than that given both by those institutions supported by public funds and those maintained by private or denominational contributions.

It has been especially noticeable that harmony and coöperation prevail among them and that they are working as a unit to promote the educational progress of North Carolina.

The institutions classified according to the standards adopted by themselves are as follows:

I. INSTITUTIONS FOR WHITE PEOPLE:

GROUP A—*Four-Year Standard Colleges:*

- Davidson College
- Elon College (since 1915)
- Greensboro College for Women (since 1915)
- Lenoir College (since 1915)
- Meredith College
- Guilford College (since 1915)

North Carolina College for Women
 Salem College (since 1915)
 Trinity College
 University of North Carolina
 Wake Forest College

GROUP B—*Four-Year Colleges in Class B, giving three years of Standard College Work:*

Flora Macdonald College
 Queens College
 St. Genevieve of the Pines

GROUP C—*Colleges giving two years of Standard Work:*

Atlantic Christian College (rated A for 1923 on condition)
 Belmont Abbey College
 Catawba College (in class B for 1923 graduates—conditional)
 Carolina College (conditional)
 Chowan College (in class B. for graduates of 1923—conditional)
 Davenport College (probably in class B for 1923)
 Louisburg College
 Mitchell College (to be reconsidered for 1923 graduates)
 Oxford College (two-year course accepted for 1923)
 Peace Institute
 St. Mary's School
 Weaver College (conditional)

Technical Institutions:

North Carolina State College of Agriculture and Engineering (four-year course). (Recommended for A rating in 1923.)

Teachers' Colleges:

East Carolina Teachers College (four-year course)

Standard Normal Schools:

Asheville Normal School (since 1922)
 East Carolina Teachers College (two-year course)

II. INSTITUTIONS FOR COLORED PEOPLE:

GROUP B—*Four-Year Institutions in Class B:*

Biddle University
 Shaw University

GROUP C—*Colleges giving two years of Standard Work:*

Agricultural and Technical College
 Livingston College

GROUP D—*Colleges giving one year of Standard Work:*

Bennett College (reconsidered for higher rating 1923)
 National Training School (reconsidered for higher rating in 1922)

VIII

THE CERTIFICATION OF TEACHERS

A successful teacher should possess the following qualifications: (1) scholarship, or knowledge of the subject matter to be used in school for the education of the children; (2) professional training, or an understanding of child nature and how to use the subject matter to the best advantage; (3) experience, or a certain skill in teaching derived from practice; and (4) personality, or a mode of expression and a manner of living that reinforces technical instruction. A teachers' certificate should define to a certain extent the first three qualifications, namely; scholarship, professional training, and experience. A teacher may have all three but still be a poor instructor because of her personality. It is the duty, therefore, of the local officials to determine the actual worth of a teacher and regulate the salary accordingly.

The State issues two classes of certificates: (1) The Standard, and (2) the Non-Standard, and the Department of Education has a record of the scholarship, professional training, and experience of every teacher to whom a State certificate is issued.

The lowest standard certificate is based on graduation from a standard high school plus six weeks of professional training. Each year of full college credits beyond the high school together with a fixed amount of professional training in the art of teaching and managing pupils and the principles of education, entitles the teacher to a certificate one grade higher. In other words, there are four teachers' certificates corresponding to the four years of college or normal school work. But the value of the certificate is affected by professional training and experience. Therefore, the highest certificate issued is graduation from a standard four-year college including a certain amount of professional training and experience. Moreover, the plan is broad enough to place in this standard class our good experienced teachers of long service although they may not be able to present high school and college credits. Many of these are certificated in the highest class today. The suggested salary schedule provides \$65.00 a month for the lowest standard certificate, and \$133.00 for the highest provided the teacher has had four years of experience. Many counties and cities supplement this amount. Therefore, in many instances teachers are paid higher than the suggested salary. The non-standard certificate is issued to a much lower grade of teachers, those that have not had the equivalent of a high school education and many who have not even completed the elementary schools. They are unable, of course, to secure the lowest standard certificate mentioned above, and are, therefore, classified and certificated in the non-standard group according to fitness and are paid from \$35.00 to \$60.00 a month.

School officials in the future should be prohibited from employing teachers of non-standard grade whenever it is possible to employ teachers of standard

grade. They are not competent to teach and their unfitness hinders the educational progress of the community they try to serve. Many counties have already realized this and refuse to employ teachers holding the lowest grade of certificate.

The certificate represents certain training and experience. The salary schedule recommended by the State Board of Education suggests a fair compensation for each stage of training and experience, and determines the amount that will be allowed from the Equalizing Fund. It should be stated here that successful experience is a large factor in determining the salary of a teacher and should be the guide in fixing salaries. For example: A college graduate without experience and professional training does not rate in the salary scale as high as a teacher having one year of college training and five years of successful experience. It is easy to see, therefore, that the cost of education in a county depends upon the kind and the number of teachers employed, and the number of teachers depends upon the number of pupils in average daily attendance in each district. The State salary schedule is a guide to county officials in measuring the efficiency of the teachers. The certification plan has taught patrons how to select the better prepared teachers and it has encouraged all teachers to improve their standing.

The Carnegie Foundation for the Advancement of Teaching, having its headquarters in New York, but operating in every State in the Union, says in its report of 1922:

"North Carolina has given a striking example of what is probably the clearest, simplest, and wisest policy of applying State funds to public education." In speaking of the effects of this system it adds: "This is a remarkable performance," and "The principles should be precisely the same in meeting the requirements of the more highly developed situations in New York, Illinois, and California."

IX

PROGRESS OF THE TEACHERS

The State Department of Education has had remarkable co-operation from the higher institutions during the past three years. The University and our colleges and normal schools are working in complete harmony and the State has never known a finer spirit to prevail among them. They are placing special emphasis on teacher training and through their assistance the State Department of Education is able to outline a plan for the improvement of teachers that makes it possible for any progressive teacher to increase his or her scholarship or professional standing.

The program of teacher training is so outlined that teachers holding standard certificates attend the higher institutions, while those holding the non-standard certificates have county summer schools or special training in our high schools and normal schools. As a result of these appropriations the teachers have made unprecedented progress during the past three years.

The table below shows how the poor teachers are disappearing, how the number of better prepared teachers has increased and how fast the teaching profession is being raised. A State law requiring all teachers to be certificated was passed in 1917. It was not until 1919, following the close of the World War, that all could be certificated. The improvement in the standing of the teachers within three years is significant, and shows with what remarkable rapidity the number of good teachers will increase when the State puts a premium on training and length of service.

	<i>1919-20</i>	<i>1920-21</i>	<i>1921-22</i>
Number of teachers employed	15,993	17,523	19,540
Number holding standard certificate.....	7,491	10,141	14,379
Number below standard grade.....	8,502	7,382	5,161
Number teachers attending summer school from six to twelve weeks.....	7,787	10,911	12,500

A study of these figures will disclose the fact that the number of teachers of standard grade has increased nearly 100% within three years. In 1919-20 this grade of teachers numbered only 7,491, or 46% of the total. But in 1921-22 the number was 14,379, or 74% of the entire number employed. Moreover, the number of poorly qualified non-standard teachers has been reduced from 64% in 1919 to 26% in 1921-22. We have employed in 1921-22 almost as many teachers of standard grade as the total number employed in 1919.

What has caused this remarkable improvement in the personnel of the teaching profession? It was the promise given the teachers that if they would improve their efficiency they would be rewarded, and that a difference would be made between the qualified and the unqualified teachers. In order to give them the opportunity to improve themselves, the State provided summer schools to run from six to twelve weeks. The first year these schools were opened, 7,787 teachers attended the entire term, and

for the year just closed the number was approximately 12,500, including those who attended summer schools in other States. Our departments of education in the colleges have been filled to overflowing, and we have drawn largely from the normal schools of the adjoining States. In addition to these, numbers of old and experienced teachers who had left the profession because they could not teach and live on the income, returned gladly when they realized that at least some premium would be placed on fitness. This is the distinct advantage of a State system of certificating teachers over a county system. A county system cannot maintain one standard for the whole State. But it will have as many standards as there are counties. Having a number of standards it would be impossible to determine a fair salary for different grades of teachers.

All of our teacher training institutions should be strengthened. But our mountain counties have been handicapped because they have not had the benefits of normal or college trained teachers, to the extent that other sections of the State have had. They have been too far removed from the influence of our higher institutions. If these counties are to progress at a rate equal to that of the more favored counties of the State, it is absolutely necessary for the State to enlarge the normal schools at Boone and Cullowhee. These institutions are well located to serve the mountain counties. But they should be so equipped that their influence will be considerably greater. This section of our State has been neglected in the past, and in order to give it a fair chance it will be necessary to double the capacity of each institution. If this is done Boone and Cullowhee will measure up to the standard of good normal schools.

We can maintain our summer school program if the same appropriation allowed by the General Assembly of 1921 is continued. As the number of low grade teachers disappear, the need for county summer schools will disappear.

X

SUPERVISION OF NEGRO EDUCATION

During the past two years we have had better opportunity to study the scope and character of the educational opportunities offered the children of the Negro race. This has been made possible by the act of the General Assembly of 1921, which created a Division of Negro Education in the office of the Superintendent of Public Instruction for the purpose of giving better supervision of the Negro schools. Before this time these schools were neglected. Practically all the supervision given was the result of donations from foreign agencies. As a result it was becoming more and more a tendency for the negroes to look to forces outside the State for guidance rather than to the State itself. The effect of this could not be the most wholesome. Both races in the State should look to our government for direction and such help as may be necessary—not to agencies outside of the State. If any group of people depend upon foreign agencies for guidance it will lose its allegiance to the State itself. For the first time in our history the State has had the opportunity to study somewhat in detail the nature of our higher institutions, and I regret to say that here and there spurious institutions of doubtful value are springing up and living on contributions solicited from many sources. Some are illegitimate agencies finding it profitable to vilify the people of our State in order to extract small donations from provincial missionary boards or from pious and well meaning individuals of other States that may be moved by pathetic stories of neglect. We have had occasion to expose a few of these frauds during the past year. And I may add here that they are not confined to the negro race.

Through the Division of Negro Education we have been able to study more closely the work in the elementary schools and in the normal schools. It is very necessary for the State to give careful direction to the education of the negroes if we are to have continued harmony and prosperity.

The creation of the Division of Negro Education, therefore, was very opportune. Its annual cost to the State is negligible—only \$12,500 for the year 1921-22. But the fact that the negroes had representation in the government to whom they could look for guidance gave them a new loyalty to the State. Their coöperation has been phenomenal. The officials of the State presenting this division have secured through their supervision of the rural schools, donations from negroes amounting annually to approximately \$100,000. As a result of this supervision the negroes complain considerably less. They are more hopeful and they have caught the spirit of coöperation. Therefore, in practically every county where a large number of negroes reside they have contributed freely of their funds to help erect their own school buildings and to maintain their public schools on a higher plane. These funds are deposited with the county board of education and are spent as other public funds are spent. The fact that

they have contributed approximately \$100,000 annually is in itself an evidence of their coöperation. Moreover, the leading negroes of the State are more optimistic than ever before. A greater harmony prevails between the races, and the relationship existing at this time is said to be the best to be found in any State in the Union. And this is due in a large measure to the fine supervision of the members of the division of Negro Education.

The salary schedule for the negro teachers is lower than that for the white teachers. Moreover, only a small per cent of the negro teachers hold the higher certificates. Therefore, the per capita cost of instructing the negro children is considerably less than that of instructing the white children. But the officials in the several counties of the State as a rule, show a sympathetic attitude toward the education of the negroes. They are erecting better school buildings for them and giving their teachers helpful guidance. In our towns and cities the school buildings erected for the negroes within the past two years are very creditable.

At the present time there are only four standard public high schools for the negroes. Their children, as a rule, do not remain in school long enough to complete the elementary grades. Many of our towns and cities have endeavored to establish standard high schools for them and give them vocational training that will be helpful to them. But it is an exception for a negro child to remain in the public schools long enough to complete a four years standard course. The State is coöperating with the private schools and the spirit among these institutions is indeed hopeful, and the officials are coöperating in a fine way with the State.

The Division of Negro Education has supervision of the three Negro Normal Schools which have been greatly strengthened during the past two years. But if they are to become real normal schools and are to exercise the influence over the rising generation of negroes that we might reasonably expect, it is necessary for the State to enlarge these institutions very materially and provide somewhat more liberally for their maintenance.

This Division has supervision also of the Indian Normal School located at Pembroke. The attitude of the State to the Indians within the past two years has also been more hopeful. The Indians are proud of their School and have a pride in the State because of what it is doing. This school should also be enlarged and better equipped.

XI

ILLITERACY AND COMPULSORY ATTENDANCE

The census of 1920 shows that the native white illiteracy has decreased within the past ten years from 14% to 8.2%, and for both races from 18.5% to 13.1%. By far the larger part of the illiterates remaining today are adults who did not have the advantage of an education twenty years ago. The census of 1920 shows the illiteracy of children of school age between ten and twenty-one years of age, inclusive, and we may see from these figures how effective the schools have been. In 1920 the illiteracy of white children between ten and twenty-one years of age in twenty-five counties was 2% and less; in three counties it was less than 1%; in thirty-four counties between 2 and 4%; in nineteen counties between 4 and 6%; and in the other twenty-two counties between 6 and 9½%.

The school system was reorganized beginning with the school year, 1919-20, the term was lengthened, more teachers were employed, and the compulsory school law was made effective. Since the Federal census was taken, therefore, we have had two very successful school years, and the records show that practically 100% of the children of compulsory school age (between seven and fourteen) were enrolled in school. Therefore, the illiteracy of the next generation will practically disappear. Our problem now is to maintain good school standards and teach those who are beyond school age.

The need of a stricter enforcement of the compulsory attendance law is very apparent. For example: We found in one county 402 pupils from 14 to 16 years of age now attending school that had not completed the fourth grade. In other words, boys and girls of high school age have not been in school long enough to learn to read and write with ease and use numbers intelligently. These young people are certified for employment in the mills. Therefore, I believe that children under 16 years of age who have not completed the elementary school should be required to attend school until they have completed at least the seven grades of work as outlined in the elementary school. Our compulsory school law requires the attendance in school of children between the ages of 7 and 14. But in our towns and cities and mill villages, continuation or part time schools can be provided with little additional expense, which would permit children between 14 and 16 years of age to attend school a part of the time. They might work a half day and attend school a half day, or follow the alternate week plan. This is being tried successfully in North Carolina, and in most of the States of the Union.

During the scholastic year 1920-21, fifty-two counties organized schools or classes for adult beginners and had regularly paid teachers, the State paying one-half the expenses and the counties the other half.

Beginning with the scholastic year 1921-22, the schools for adults were made a part of the public school system and were financed as other schools of the counties were financed. During the biennial period special texts

peculiarly suited to these schools have been prepared and published. Perhaps the most noticeable piece of work done in the State is to be found in Buncombe County. I have received letters from mothers, who heretofore had been illiterate, in which they express appreciation for this work and a joy in the fact that they learned to write to their children.

The illiterate adult population will never learn to read and write in my judgment unless the State gives special aid. Making these schools a part of the public school system is not sufficient. This is a peculiar class that needs special attention. Not only the State and County officials but our churches, fraternal organizations and women's clubs should cooperate to eliminate illiteracy from this class of our population.

XII

SUPERVISION OF INSTRUCTION

The State Department of Education maintains a staff of special supervisors that gives assistance to counties in the organization of the rural schools, in directing professional courses for teachers, in outlining courses of study for the elementary and high schools, and in improving the instruction in the school room. That the schools are better organized and the instruction is more effective is proved by the figures which show that the number of pupils completing the elementary schools has been increasing at the rate of 50% a year for the past two years. But the demand for assistance from the State Department is considerably more than we can give. I wish now to point out a few specific instances where additional emphasis should be placed.

The State Department of Education should be empowered to give the cities, towns, and counties more assistance in organizing schools and in securing more thorough instruction. Few people realize to what extent the cost of instruction is related to the organization of the school system. Both the cost and the value of instruction depend in a large measure upon the organization. A large per cent of the superintendents in our towns and villages need special assistance at this point for not only is the per capita cost of instruction reduced by a skilful classification of the children in the larger school units, but the instruction is greatly improved thereby.

During the past year the State Department of Education has held meetings with the superintendents and principals and has given so far as possible the best advice in good organization. The manner in which this advice was received is evidence that our superintendents are taking advantage of every opportunity to improve their school system. As a result of these conferences the superintendents voluntarily cut down the number of supervisors in city schools and raised the average attendance per teacher especially in the high school. It is easy to see that these economies reduced the per capita cost of instructing children and it may be done without reducing the efficiency of the instruction.

A well trained man who understands good school organization, how classes should be organized, and promotions encouraged would be of the greatest value to the State. The younger men going into the profession need this assistance which would improve materially the instruction in the schools and would locate places in the system where economies could be effected.

We should place more emphasis on the teaching of North Carolina history. The picture of the "Lost Colony" taken by the State Department of Education two years ago and exhibited throughout the State has greatly stimulated not only the study of North Carolina history by adults, but it has increased the teaching of this subject in the schools. We should give more time to collecting and arranging courses for our schools in North

Carolina history. Every school should have a good map of North Carolina and the school program should devote some time each week to a study of North Carolina geography and its resources.

Another subject that can be made of the greatest value to our State is civics. Our text-books, as a rule, do not give the pupils in schools that intimate knowledge of our local government that its importance demands. The State could well afford to provide a supervisor of civics, who could make a study of county government and hold up to the State the best standards of good government and the duties of a good citizen. Courses in civics should be based on our local and State government. Good citizenship is too valuable to be neglected in our schools or left to chance instruction. It should be made a definite part of our educational program. If one or two cities or counties should profit by such instruction the value to the State would be considerably more than the small cost of the supervision. The State should be constantly holding up fair standards of county and city government to its citizens and for use in the public schools. Before young people will become deeply interested in the subject the adults must take an interest in it. It seems to be nobody's business to hold up standards of good government. This is an educational problem that can be solved if we will address ourselves to the task.

Our schools should give more emphasis to the subject of health education, or as it is usually termed, physical education. Our superintendents are asking for guidance in the teaching of this subject. Many city schools have employed directors of physical education. There should be one supervisor for the State whose duty it should be to help organize this subject and find a proper place in the school curriculum where it will be of the greatest value to all the children attending school. A little skillful guidance would be of the greatest value to the State. The General Assembly of 1921 made provision for a State Supervisor of Physical Education, but owing to the great need in increasing the size of the Equalizing Fund this supervisor was never employed. I believe this appropriation should be continued and should be applied to this purpose.

Another subject that can be made of the greatest value to the State is the proper use of the library. We are encouraging the building of libraries, and while the sum appropriated is not large our counties, cities and towns are attempting to build local libraries for the use of the adults and the pupils in school. But the teachers, as a rule, do not know how to use the books in school. Some of our best teachers have had instruction along these lines, but a great majority have no idea how to use the library in schools. If we are to develop a reading public in the most helpful literature, it is necessary for the State to give some direction to this work. A good supervisor of library instruction could raise the culture level by encouraging a wise use of books.

Public school music should be required in all the schools of the State. With the passing of the old time singing master no one has taken his place in our communities and small towns. Here and there the people themselves have tried through community singings to preserve the best music and retain an appreciation of it. But this cannot be successful in a

large way without some guidance. There is a need for definite support. People everywhere respond quickly to good music and if they have the right kind of leadership they will have good music.

In speaking of these special subjects, I am conscious of the fact that the traditional subjects should not be neglected. Teachers should be directed in securing the best use of them. But if the schools are rightly organized the special subjects referred to above will give strength to the traditional subjects and awaken new interest in the pupils.

We contemplated to carry out the greater part of this program after the General Assembly of 1921 closed. The appropriations were sufficient. But when it was discovered that the State Equalizing Fund was totally inadequate, we voluntarily reduced the appropriations to the State Department of Education below the specific amount required by the special session of the General Assembly of 1921. By doing this we were compelled to withhold needed assistance. The State Department of Education should be equipped, therefore prepared, to give assistance at all times, wherever such assistance will safe-guard public funds, improve the organization of schools and secure better instruction of the children.

B. SCHOOL EXPENDITURES

TABLE III. SUMMARY OF EXPENDITURES, 1920-1921

This table gives the total amount spent for teaching and supervision, administration, operation and maintenance of plants, outlay payments, borrowed money repaid, and the balance on hand June 30, 1921.

SUMMARY OF TABLE III AND COMPARISON WITH 1919-1920

	Rural	City	North Carolina
Total expenditures (exclusive of borrowed money repaid), 1920-'21.....	\$11,564,666.30	\$ 5,923,097.40	\$ 17,487,763.70
Total expenditures (exclusive of borrowed money repaid), 1919-'20.....	7,973,640.86	4,240,617.34	12,214,258.20
Increase.....	3,591,025.44	1,682,480.06	5,273,505.50
EXPENSES: (Costs of conducting school system):			
Teaching and supervision, 1920-'21.....	7,848,680.00	3,946,747.69	11,795,427.69
Teaching and supervision, 1919-'20.....	5,717,705.59	2,727,994.15	8,445,699.74
Increase.....	2,130,974.41	1,218,753.54	3,349,727.95
Administration, 1920-'21.....	333,922.40	92,254.17	426,176.57
Administration, 1919-'20.....	300,119.99	77,587.13	377,707.12
Increase.....	33,802.41	14,667.04	48,469.45
Operation and maintenance of plants, 1920-'21.....	717,862.03	532,808.88	1,250,670.91
Operation and maintenance of plants, 1919-'20.....	338,436.67	406,899.57	745,336.24
Increase.....	379,425.36	125,909.31	505,334.67
Total—Teaching, administration, operation and maintenance, 1920-'21.....	8,900,464.43	4,571,810.74	13,472,275.17
Total—Teaching, administration, operation and maintenance, 1919-'20.....	6,356,262.25	3,212,480.85	9,568,743.10
Increase.....	2,544,202.18	1,359,329.89	3,903,532.07
OUTLAYS (for permanent improvements and repayments of bonds, loans, etc.):			
Outlay payments for new buildings, sites, and repairs, 1920-'21.....	2,664,201.87	1,351,286.66	4,015,488.53
Outlay payments for new buildings, sites, and repairs, 1919-'20.....	1,617,378.61	1,028,136.49	2,645,515.10
Increase.....	1,046,823.26	323,150.17	1,369,973.43
Balance on hand, June 30, 1921.....	\$ 229,972.18	\$ 329,701.99	\$ 559,674.17
Borrowed money repaid, bonds, etc., 1920-'21.....	\$ 1,839,312.86	\$ 1,380,650.99	\$ 3,219,963.85
Borrowed money repaid, bonds, etc., 1919-'20.....	875,798.70	851,047.14	1,726,845.84
Increase.....	963,514.16	529,603.85	1,493,118.01
Percentage spent for teaching and supervision, 1920-'21.....	67.9	66.7	67.5
Percentage spent for administration, 1920-'21.....	2.9	1.5	2.4
Percentage spent for operation and maintenance, 1920-'21.....	6.2	9.0	7.1
Percentage spent for new buildings and equipment, 1920-'21.....	23.0	22.8	23.0
Amount spent for each child of school age, 1920-'21.....	17.09	32.28	20.33
Amount spent for each child enrolled, 1920-'21.....	20.54	40.87	24.70
Amount spent for each child attending daily, 1920-'21.....	30.21	52.82	35.33

EXPENDITURES, 1920-1921

TABLE IV. SPENT FOR TEACHING AND SUPERVISION, 1920-1921

This table shows the mount of money expended for teaching and supervision and a comparison with the total amount spent for schools.

SUMMARY OF TABLE IV AND COMPARISON WITH 1919-1920

	Rural	City	North Carolina
Total of all expenditures (exclusive of borrowed money) 1920-'21.....	\$11,564,666.30	\$ 5,923,097.40	\$ 17,487,763.70
Total of all expenditures (exclusive of borrowed money) 1919-'20.....	7,973,640.86	4,240,617.34	12,214,258.20
Increase.....	3,591,025.44	1,682,480.06	5,273,505.50
Supervision (superintendents), 1920-'21.....	243,229.25	324,456.39	567,685.64
Supervision (superintendents), 1919-'20.....	182,558.39	250,901.80	433,460.19
Increase.....	60,670.86	73,554.59	134,225.45
White teachers, 1920-'21.....	6,314,379.96	3,099,784.22	9,414,164.18
White teachers, 1919-'20.....	4,564,907.98	2,129,645.14	6,694,553.12
Increase.....	1,749,471.98	970,139.08	2,719,611.06
Colored teachers, 1920-'21.....	1,653,450.14	489,154.94	1,542,605.88
Colored teachers, 1919-'20.....	819,372.03	339,654.51	1,159,026.54
Increase.....	234,078.91	149,500.43	383,579.34
Teacher training, 1920-'21.....	84,698.24	-----	84,698.24
Teacher training, 1919-'20.....	43,507.10	4,410.11	47,917.21
Increase.....	41,191.14	*4,410.11	36,781.03
Rural supervision, 1920-'21.....	64,381.31	-----	64,381.31
Rural supervision, 1919-'20.....	34,048.84	-----	34,048.84
Increase.....	30,332.47	-----	30,332.47
Home demonstration and public welfare, 1920-'21.....	88,540.30	33,352.14	121,892.44
Home demonstration and public welfare, 1919-'20.....	73,311.25	3,382.59	76,693.84
Increase.....	15,229.05	29,969.55	45,198.69
Total for teaching and supervision, 1920-'21.....	7,848,680.00	3,946,747.69	11,795,427.60
Total for teaching and supervision, 1919-'20.....	5,717,705.59	2,727,994.15	8,445,699.74
Increase.....	2,130,974.41	1,218,753.54	3,349,727.95
Percentage for teaching and supervision, 1920-'21.....	67.9	66.6	67.5
Percentage for teaching and supervision, 1919-'20.....	71.6	64.4	69.2
Increase.....	*3.7	2.2	*1.7
Percentage for supervision alone (superintendents), 1920-'21.....	2.1	5.5	3.2
Percentage for supervision alone (superintendents), 1919-'20.....	2.2	5.9	3.5
Increase.....	*.1	*.4	*.3
Average salary of superintendents, 1920-'21.....	2,432.29	2,515.16	2,478.97
Average salary of superintendents, 1919-'20.....	1,825.58	1,930.01	1,884.60
Increase.....	606.71	585.15	594.37

*Decrease.

Percentage of colored enrollment, ages 8 to 13 inclusive, in average daily attendance, 1919-'20.....	72.0	75.0	73.0
Increase.....	1.4	1.5	1.1

D. TEACHERS, SALARIES, AND LENGTH OF TERM

TABLE XI. SALARIES AND TERM, NUMBER AND SEX OF TEACHERS,
1920-1921

This table shows by races the total number of teachers, rural and city, employed during 1920-1921, the school term in days, the amount paid teachers, the average annual amount paid each teacher and the average monthly amount paid each teacher.

SUMMARY OF TABLE XI AND COMPARISON WITH 1919-1920

	Rural	City	North Carolina
Total number teachers, 1920-'21.....	14,459	3,902	18,361
Total number teachers, 1919-'20.....	13,265	3,589	16,854
Increase.....	1,194	313	1,507
Number white teachers employed, 1920-'21.....	11,056	3,109	14,165
Number white teachers employed, 1919-'20.....	10,144	2,826	12,970
Increase.....	912	283	1,195
Number white male teachers employed, 1920-'21.....	1,911	292	2,203
Number white male teachers employed, 1919-'20.....	1,685	286	1,971
Increase.....	226	6	232
Number white female teachers employed, 1920-'21.....	9,145	2,817	11,962
Number white female teachers employed, 1919-'20.....	8,457	2,540	10,997
Increase.....	688	277	965
Number colored teachers employed, 1920-'21.....	3,403	793	4,196
Number colored teachers employed, 1919-'20.....	3,121	763	3,884
Increase.....	282	30	312
Number colored male teachers employed, 1920-'21.....	603	122	725
Number colored male teachers employed, 1919-'20.....	573	120	693
Increase.....	30	2	32
Number colored female teachers employed, 1920-'21.....	2,800	671	3,471
Number colored female teachers employed, 1919-'20.....	2,548	643	3,191
Increase.....	252	28	280
Amount paid all teachers, 1920-'21.....	\$7,367,830.90	\$3,588,939.16	*\$10,956,770.06
Amount paid all teachers, 1919-'20.....	5,384,280.01	2,469,299.65	7,853,579.66
Increase.....	1,983,550.89	1,119,639.51	3,103,190.40
Amount paid white teachers, 1920-'21.....	6,314,379.96	3,099,784.22	9,414,164.18
Amount paid white teachers, 1919-'20.....	4,564,907.98	2,129,645.14	6,694,553.12
Increase.....	1,749,471.98	870,139.08	2,719,611.06
Amount paid colored teachers, 1920-'21.....	1,053,450.94	489,154.94	1,542,605.88
Amount paid colored teachers, 1919-'20.....	819,372.03	339,654.51	1,159,026.54
Increase.....	234,078.91	149,500.43	383,579.34
Average annual amount paid each teacher, 1920-'21.....	509.56	919.76	596.74
Average annual amount paid each teacher, 1919-'20.....	405.90	688.02	465.98
Increase.....	103.66	231.74	130.76
Average annual amount paid each white teacher, 1920-'21.....	571.10	997.03	664.61
Average annual amount paid each white teacher, 1919-'20.....	450.01	753.66	516.15
Increase.....	121.09	243.37	148.46
Average annual amount paid each colored teacher, 1920-'21.....	309.56	616.84	367.63
Average annual amount paid each colored teacher, 1919-'20.....	262.85	445.15	293.45
Increase.....	46.71	171.69	69.18
Average term of all schools (in days), 1920-'21.....	125.0	176.4	135.9
Average term of all schools (in days), 1919-'20.....	124.5	169.0	134.0
Increase.....	.5	7.4	1.9

*See Table IV.

TABLE XI. SALARIES AND TERM—Continued.

	Rural	City	North Carolina
Average term of white schools (in days), 1920-'21.....	126.6	176.7	137.6
Average term of white schools (in days), 1919-'20.....	126.4	170.1	135.9
Increase.....	.2	6.6	1.7
Average term of colored schools (in days), 1920-'21.....	119.7	175.3	130.2
Average term of colored schools (in days), 1919-'20.....	118.3	165.1	127.4
Increase.....	1.4	10.2	2.8
Average monthly salary paid all teachers, 1920-'21.....	\$ 81.52	\$ 104.28	\$ 87.82
Average monthly salary paid all teachers, 1919-'20.....	65.20	81.42	69.55
Increase.....	16.30	22.86	18.27
Average monthly salary paid white teachers, 1920-'21.....	90.22	112.85	96.60
Average monthly salary paid white teachers, 1919-'20.....	71.20	88.66	75.90
Increase.....	19.02	24.19	20.70
Average monthly salary paid colored teachers, 1920-'21.....	51.72	80.37	56.47
Average monthly salary paid colored teachers, 1919-'20.....	44.47	53.95	46.85
Increase.....	7.25	16.42	9.62

TABLE II. PER CAPITA AMOUNT RAISED FOR EACH CHILD

This table shows the school fund actually raised during the year, the per capita amount raised for each child of school age, the total amount of all taxable property and the amount of taxable property for each child of school age.

	Rural	City	North Carolina
Total available fund (exclusive of borrowed money), 1921-'22.	\$14,391,366.90	\$11,079,667.97	\$ 25,471,034.87
Total available fund (exclusive of borrowed money), 1920-'21.	10,901,662.71	5,754,942.17	16,656,604.88
Increase	3,489,704.19	5,324,725.80	8,814,429.99
School population, 1921-'22.	688,280	201,126	889,406
School population, 1920-'21.	676,844	183,484	860,328
Increase	11,436	17,642	29,078
School enrollment, 1921-'22.	587,472	166,226	753,698
School enrollment, 1920-'21.	562,844	144,918	707,762
Increase	24,628	21,308	45,936
Available fund for each child, 1921-'22.	\$ 20.91	\$ 55.09	\$ 28.64
Available fund for each child, 1920-'21.	16.10	31.36	19.36
Increase	4.81	23.73	9.28
Available fund for each child enrolled, 1921-'22.	24.50	66.65	33.79
Available fund for each child enrolled, 1920-'21.	19.36	39.71	23.53
Increase	5.14	26.94	10.26
Total funds raised for schools by taxation, 1921-'22.	11,073,887.32	6,168,019.11	17,241,906.43
Total funds raised for schools by taxation, 1920-'21.	7,929,746.73	4,085,289.27	12,015,036.00
Increase	3,144,140.59	2,082,729.84	5,226,870.43
Amount raised by taxation for each child, 1921-'22.	16.08	30.66	19.38
Amount raised by taxation for each child, 1920-'21.	11.71	22.26	13.96
Increase	4.37	8.40	5.42
Amount raised from revenue sources for each child, 1921-'22.	17.33	31.64	20.57
Amount raised from revenue sources for each child, 1920-'21.	13.02	23.75	15.31
Increase	4.31	7.89	5.26
Value of taxable property, 1921.			2,579,075,600.00
Value of taxable property for each child.			2,899.77
Amount raised for each \$100 value of taxable property, 1921-'22.			.98
Amount raised for each \$100 value of taxable property, 1920-'21.			.67
Amount raised for each inhabitant, 1921-'22.			9.71
Amount raised for each inhabitant, by taxation, 1921-'22.			6.63
Amount raised from revenue sources for each inhabitant, 1921-'22.			7.04

B. SCHOOL EXPENDITURES

TABLE III. SUMMARY OF EXPENDITURES, 1921-1922

This table gives the total amount spent for teaching and supervision, administration, operation and maintenance of plants, outlay payments, borrowed money repaid and the balance on hand June 30, 1922.

SUMMARY OF TABLE III, AND COMPARISON WITH 1920-1921

	Rural	City	North Carolina
Total expenditures (exclusive of borrowed money repaid), 1921-'22	\$13,148,553.04	\$ 8,501,142.95	\$ 21,649,695.99
Total expenditures (exclusive of borrowed money repaid), 1920-'21	11,564,666.30	5,923,097.40	17,487,763.70
Increase	1,583,886.74	2,578,045.55	4,161,932.29
EXPENSES (Costs of conducting school system):			
Teaching and supervision, 1921-'22	8,930,962.48	4,836,437.66	13,767,400.14
Teaching and supervision, 1920-'21	7,848,680.00	3,946,747.69	11,795,427.69
Increase	1,082,282.48	889,689.97	1,971,972.45
Administration, 1921-'22	347,693.67	115,659.18	463,342.85
Administration, 1920-'21	333,922.40	92,254.17	426,176.57
Increase	13,771.27	23,405.01	37,176.28
Operation and maintenance of plants, 1921-'22	751,621.75	548,433.76	1,300,055.51
Operation and maintenance of plants, 1920-'21	717,862.03	532,808.88	1,250,670.91
Increase	33,759.72	15,624.88	49,384.60
Total—Teaching, administration, operation and maintenance, 1921-'22	10,030,277.90	5,500,530.60	15,530,808.50
Total—Teaching, administration, operation and maintenance, 1920-'21	8,900,464.43	4,571,810.74	13,472,275.17
Increase	1,129,813.47	928,719.86	2,058,533.33
OUTLAYS (for permanent improvements and repayment of bonds, loans, etc.):			
Outlay payments for new buildings, sites and repairs, 1921-'22	3,118,275.14	3,000,612.35	6,118,887.49
Outlay payments for new buildings, sites and repairs, 1920-'21	2,664,201.87	1,351,286.66	4,015,488.53
Increase	454,073.27	1,649,325.69	2,103,398.96
Balance on hand, June 30, 1922	\$ 1,106,105.59	\$ 2,493,384.53	\$ 3,599,490.12
Borrowed money repaid, bonds, etc., 1921-'22	\$ 3,492,057.13	\$ 1,968,286.62	\$ 5,460,343.75
Borrowed money repaid, bonds, etc., 1920-'21	1,839,312.86	1,380,650.99	3,219,963.85
Increase	1,652,744.27	587,635.63	2,240,379.90
Total expenditure, 1921-'22	16,640,610.17	10,469,429.57	27,110,039.74
Total expenditure, 1920-'21	13,463,979.16	7,303,748.39	20,707,727.55
Increase	3,236,631.01	3,165,681.18	6,402,312.19
Percentage spent for teaching and supervision, 1921-'22	67.94	56.93	63.79
Percentage spent for administration, 1921-'22	2.64	1.34	2.24
Percentage spent for operation and maintenance, 1921-'22	5.71	6.45	6.17
Percentage spent for new buildings, and equipment, 1921-'22	23.71	35.28	27.80
Amount spent for each child of school age, 1921-'22	\$ 19.10	\$ 42.26	\$ 24.34
Amount spent for each child enrolled, 1921-'22	22.38	51.14	28.72
Amount spent for each child attending daily, 1921-'22	31.64	65.07	39.63

TABLE X. SCHOOL ATTENDANCE BY COUNTIES AND TOWNS, BETWEEN AGES OF 7 AND 13, INCLUSIVE, 1921-1922

This table gives the school population between the ages of 7 and 13 years, inclusive, enrollment and average daily attendance, by races; and also the percentage of school population between 7 and 13, inclusive, enrolled; the percentage of the school population between 7 and 13, inclusive, in average daily attendance; and the percentage of the enrollment between 7 and 13, inclusive, in average daily attendance for the State for 1921-1922. It will be noted that in the 1920-1921 report the compulsory age is 8 to 13, inclusive.

SUMMARY OF TABLE X.

	Rural	City	North Carolina
Total school population, ages 7 to 13, inclusive, 1921-'22	340,595	105,115	445,710
Total school population, ages 8 to 13, inclusive, 1920-'21	295,313	64,062	379,375

Colored average daily attendance, ages 8 to 13, inclusive, 1920-'21	67,992	17,466	85,458
Percentage of school population, ages 7 to 13, inclusive, enrolled, 1921-'22	105.5	104.6	105.3
Percentage of school population, ages 8 to 13, inclusive, enrolled, 1920-'21	100.7	101.2	100.8
Percentage of white school population, ages 7 to 13, inclusive, enrolled, 1921-'22	106.9	109.0	107.4
Percentage of white school population, ages 8 to 13, inclusive, enrolled, 1920-'21	102.3	106.3	103.3
Percentage of colored school population, ages 7 to 13, inclusive, enrolled, 1921-'22	102.5	95.3	100.8
Percentage of colored school population, ages 8 to 13, inclusive, enrolled, 1920-'21	97.2	89.4	95.5
Percentage of school population, ages 7 to 13, inclusive, in average daily attendance, 1921-'22	82.8	86.0	83.5
Percentage of school population, ages 8 to 13, inclusive, in average daily attendance, 1920-'21	78.6	82.6	79.5
Percentage of white school population, ages 7 to 13, inclusive, in average daily attendance, 1921-'22	85.4	91.9	86.9
Percentage of white school population, ages 8 to 13, inclusive, in average daily attendance, 1920-'21	82.0	88.8	83.5
Percentage of colored school population, ages 7 to 13, inclusive, in average daily attendance, 1921-'22	77.4	72.9	76.4
Percentage of colored school population, ages 8 to 13, inclusive, in average daily attendance, 1920-'21	71.5	68.4	70.8
Percentage of enrollment, ages 7 to 13, inclusive, in average daily attendance, 1921-'22	78.5	82.1	77.2
Percentage of enrollment, ages 8 to 13, inclusive, in average daily attendance, 1920-'21	78.0	81.6	78.8
Percentage of white enrollment, ages 7 to 13, inclusive, in average daily attendance, 1921-'22	79.9	84.3	80.9
Percentage of white enrollment, ages 8 to 13, inclusive, in average daily attendance, 1920-'21	80.0	83.5	80.8
Percentage of colored enrollment, ages 7 to 13, inclusive, in average daily attendance, 1921-'22	74.5	76.8	75.8
Percentage of colored enrollment, ages 8 to 13, inclusive, in average daily attendance, 1920-'21	73.4	76.5	74.1

NOTE.—Inaccuracies in the census and shifting population, causing pupils to be enrolled twice, are responsible for apparent discrepancies between population and enrollment.

D. TEACHERS, SALARIES, AND LENGTH OF TERM

TABLE XI. SALARIES AND TERM, NUMBER AND SEX OF
TEACHERS, 1921-1922.

This table shows by races the total number of teachers, rural and city, employed during 1921-1922, the school term in days, the amount paid teachers, the average annual amount paid each teacher, and the average monthly amount paid each teacher.

SUMMARY OF TABLE XI AND COMPARISON WITH 1920-1921

	Rural	City	North Carolina
Total number of teachers, 1921-'22.....	15,339	4,454	19,793
Total number of teachers, 1920-'21.....	14,459	3,902	18,361
Increase.....	880	552	1,432
Number white teachers employed, 1921-'22.....	11,676	3,522	15,198
Number white teachers employed, 1920-'21.....	11,056	3,109	14,165
Increase.....	620	413	1,033
Number white male teachers employed, 1921-'22.....	2,358	369	2,727
Number white male teachers employed, 1920-'21.....	1,911	292	2,203
Increase.....	447	77	524
Number of white female teachers employed, 1921-'22.....	9,318	3,153	12,471
Number of white female teachers employed, 1920-'21.....	9,145	2,817	11,962
Increase.....	173	336	509
Number of colored teachers employed, 1921-'22.....	3,663	932	4,595
Number of colored teachers employed, 1920-'21.....	3,403	793	4,196
Increase.....	260	139	399
Number of colored male teachers employed, 1921-'22.....	829	144	973
Number of colored male teachers employed, 1920-'21.....	603	122	725
Increase.....	226	22	248
Number of colored female teachers employed, 1921-'22.....	2,834	788	3,622
Number of colored female teachers employed, 1920-'21.....	2,800	671	3,471
Increase.....	34	117	151
Amount paid all teachers, 1921-'22.....	\$ 8,404,901.83	\$ 4,445,526.34	\$ 12,850,428.17
Amount paid all teachers, 1920-'21.....	7,367,830.90	3,588,939.16	10,956,770.06
Increase.....	1,037,070.93	856,597.18	1,893,668.11
Amount paid white teachers, 1921-'22.....	7,152,419.69	3,801,262.55	10,953,682.24
Amount paid white teachers, 1920-'21.....	6,314,379.96	3,099,784.22	9,414,164.18
Increase.....	838,039.73	701,478.33	1,539,518.06
Amount paid colored teachers, 1921-'22.....	1,252,482.14	644,273.79	1,896,755.93
Amount paid colored teachers, 1920-'21.....	1,053,450.94	489,154.94	1,542,605.88
Increase.....	199,031.20	155,118.85	354,150.05
Average annual amount paid each teacher, 1921-'22.....	547.94	998.09	649.24
Average annual amount paid each teacher, 1920-'21.....	509.56	919.76	596.74
Increase.....	38.38	78.33	52.50
Average annual amount paid each white teacher, 1921-'22.....	621.13	1,079.29	720.73
Average annual amount paid each white teacher, 1920-'21.....	571.10	997.03	664.61
Increase.....	50.03	82.26	56.12
Average annual amount paid each colored teacher, 1921-'22.....	341.90	691.27	412.78
Average annual amount paid each colored teacher, 1920-'21.....	309.56	616.84	367.63
Increase.....	32.44	74.43	45.15
Average term of all schools (in days), 1921-'22.....	128.5	175.5	139.0
Average term of all schools (in days), 1920-'21.....	125.0	176.4	135.9
Increase.....	3.5	*.9	3.1
Average term of white schools (in days), 1921-'22.....	130.6	176.1	141.1
Average term of white schools (in days), 1920-'21.....	126.6	176.7	137.6
Increase.....	4.0	*.6	3.5
Average term of colored schools (in days), 1921-'22.....	121.8	173.3	132.2
Average term of colored schools (in days), 1920-'21.....	119.7	175.3	130.2
Increase.....	1.9	*.0	2.0
Average monthly salary paid all teachers, 1921-'22.....	\$ 85.28	\$ 113.74	\$ 93.41
Average monthly salary paid all teachers, 1920-'21.....	81.52	104.28	87.82
Increase.....	3.76	9.46	5.59
Average monthly salary paid white teachers, 1921-'22.....	95.11	122.57	102.15
Average monthly salary paid white teachers, 1920-'21.....	90.22	112.85	96.60
Increase.....	4.89	9.72	5.55
Average monthly salary paid colored teachers, 1921-'22.....	56.14	79.77	62.44
Average monthly salary paid colored teachers, 1920-'21.....	51.72	70.37	56.47
Increase.....	4.42	9.40	5.97

TABLE XIV. NUMBER OF RURAL SCHOOLS, 1921-1922

This table shows the number of white and colored rural schools, the school population and the land area of the counties, the number of white and colored schools having only one teacher, the number having two teachers, the number having three teachers, and the number having four or more teachers, the number of rural schools in which some high school subjects are taught, the number of children of school age to each school, and the average area in square miles of the school districts.

SUMMARY OF TABLE XIV AND COMPARISON WITH 1920-1921

	White	Colored	Total
Number of rural schools, 1921-'22.....	4,953	2,380	7,333
Number of rural schools, 1920-'21.....	5,284	2,353	7,637
Increase.....	*331	27	*304
Rural school population, 1921-'22.....	468,520	216,705	685,225
Rural school population, 1920-'21.....	463,087	213,757	676,844
Increase.....	5,433	2,948	8,381
Total area of State in square miles.....			48,580
Average area covered by each rural school, 1921-'22.....	9.8	20.4	
Average area covered by each rural school, 1920-'21.....	9.2	20.6	
Increase.....	.6	*.2	
School population to each rural school, 1921-'22.....	94.5	91.0	93.2
School population to each rural school, 1920-'21.....	87.6	90.8	89.6
Increase.....	6.9	.2	4.6
Number of schools having only one teacher, 1921-'22.....	1,795	1,504	3,299
Number of schools having only one teacher, 1920-'21.....	2,131	1,567	3,698
Increase.....	*336	*63	*399
Number of schools having two teachers, 1921-'22.....	1,870	646	2,516
Number of schools having two teachers, 1920-'21.....	1,855	605	2,460
Increase.....	15	41	56
Number of schools having three teachers, 1921-'22.....	599	133	732
Number of schools having three teachers, 1920-'21.....	633	107	740
Increase.....	*34	26	*8
Number of schools having four or more teachers, 1921-'22.....	689	97	786
Number of schools having four or more teachers, 1920-'21.....	599	.99	698
Increase.....	90	*2	88
Number of schools in which some high school subjects are taught, 1921-'22.....	1,287	78	1,365
Number of schools in which some high school subjects are taught, 1920-'21.....	1,193	67	1,260
Increase.....	94	11	105

*Decrease.

TABLE XV. CONSOLIDATION OF SCHOOLS, 1921-1922

This table shows the number of consolidated schools having four teachers, the number having six teachers, the number having more than six teachers, the number of districts abolished by consolidation, the number of schools in which some high school subjects are taught, the number of trucks used for transportation, and the number of pupils transported.

SUMMARY OF TABLE XV AND COMPARISON WITH 1920-1921

	White	Colored	Total
Number consolidated schools having:			
Four teachers, 1921-'22.....	106	21	127
Six teachers, 1921-'22.....	74	4	78
More than six teachers, 1921-'22.....	146	4	150
Number of districts abolished by consolidation, 1921-'22.....	327	39	366
Number of districts abolished by consolidation, 1920-'21.....	195	24	219
Increase.....	132	15	147
Number of schools in which some high school subjects are taught, 1921-'22.....	1,287	78	1,365
Number of schools in which some high school subjects are taught, 1920-'21.....	1,193	67	1,260
Increase.....	94	11	105
Number of trucks used for transportation, 1921-'22.....			*528
Number of pupils transported, 1921-'22.....			20,359

*Includes 4 wagons, 3 touring cars.

TABLE XVI. RURAL SCHOOLHOUSES, 1921-1922

The following table shows the number of rural schoolhouses, white and colored, the number built of brick, the number of frame, and the number of log schoolhouses, the number of districts having no house, the number of schoolhouses furnished with patent desks, the number furnished with home-made desks, and the number furnished with benches, the number of new rural schoolhouses built and their cost.

SUMMARY OF TABLE XVI AND COMPARISON WITH 1920-1921

	White	Colored	North Carolina
Number of schoolhouses, 1921-'22.....	5,014	2,309	7,323
Number of schoolhouses, 1920-'21.....	5,184	2,283	7,467
Increase.....	*170	26	*144
Number built of brick, 1921-'22.....	306	3	309
Number built of brick, 1920-'21.....	244	4	248
Increase.....	62	*1	61
Number of frame houses, 1921-'22.....	4,699	2,244	6,943
Number of frame houses, 1920-'21.....	4,927	2,211	7,138
Increase.....	*228	33	*195
Number of log houses, 1921-'22.....	9	62	71
Number of log houses, 1920-'21.....	13	68	81
Increase.....	*4	*6	*10
Number of districts having no house, 1921-'22.....	59	128	187
Number of districts having no house, 1920-'21.....	52	138	190
Increase.....	7	*10	*3
Number of houses furnished with patent desks, 1921-'22.....	4,056	991	5,047
Number of houses furnished with patent desks, 1920-'21.....	4,013	893	4,906
Increase.....	43	98	141
Number of houses furnished with home-made desks, 1921-'22.....	894	932	1,826
Number of houses furnished with home-made desks, 1920-'21.....	1,124	1,031	2,155
Increase.....	*230	*99	*329
Number of houses furnished with benches, 1921-'22.....	255	485	740
Number of houses furnished with benches, 1920-'21.....	333	439	772
Increase.....	*78	46	*32
Number of new schoolhouses built, 1921-'22.....	196	128	324
Number of new schoolhouses built, 1920-'21.....	180	84	264
Increase.....	16	44	60
Cost of new schoolhouses built, 1921-'22.....	\$ 2,644,925.00	\$ 288,665.00	\$ 2,933,590.00
Cost of new schoolhouses built, 1920-'21.....	2,013,450.00	194,565.00	2,208,015.00
Increase.....	631,475.00	94,100.00	725,575.00

*Decrease.

TABLE XVII. REPORT OF RURAL LIBRARIES, 1920-1922

Total number of original libraries to June 30, 1922.....	4,882
Total number of supplemental libraries to June 30, 1922.....	2,269
Total number of original libraries established from June 30, 1920, to June 30, 1922.....	196
Total number of supplemental libraries from June 30, 1920, to June 30, 1922.....	144

TABLE XVIII. LOCAL TAX DISTRICTS, 1920-1922

The following list shows by counties the number of local tax districts in each county to June 30, 1922. The tendency toward an increase in the number of local tax districts has been lessened by consolidation, but the amount of territory and the number of pupils residing within the districts has been correspondingly increased as the size of the units is enlarged by consolidation.

TABLE XX. LOANS FROM THE SPECIAL BUILDING FUND
YEAR ENDING JUNE 30, 1922

Under the provisions of Chapter 147 of the Public Laws of 1921 the State Board of Education was authorized to issue bonds in amounts not to exceed a total of \$5,000,000.00 and to lend the money secured therefrom to the several counties of the State to be used in the construction of modern schoolhouses. Prior to June 30, 1922, bonds amounting to \$1,000,000 had been issued, and the following table shows the amount lent each county and the district in which the funds were used.

TABLE XXI. EMERGENCY LOAN FUND FOR SPECIAL TAX DISTRICTS
1920-1922

On account of the ten per cent limitation in 1920 on the tax levy, the General Assembly created an Emergency Loan Fund for Special Tax Districts under Section 6, Chapter 1, Public Laws, 1920 (Revenue Act), which provided "That whenever the school governing body of any county, city, town, township, or other special-tax district having special taxes for schools voted by the people, before the passage of this act, to increase the school term beyond the constitutional limit of six months shall find that the amount to be derived from said special taxes as authorized in section 5 of this act, is insufficient to maintain the school term of said county, city, town, township, or other special-tax district for the year 1920-1921 the same length of term as maintained in the year 1919-20, said school governing body is authorized to make a detailed statement to the county board of education as to the amount needed" and upon the authorization of the State Board of Education the State Treasurer should borrow "an amount not to exceed \$300,000.00 to be loaned for the purpose specified above," at a rate of interest not to exceed the rate the State Treasurer would have to pay for money borrowed under the provisions of this section and to be repaid by the County Boards of Education to the State Board of Education in not more than five annual installments.

After the State Board of Education had reviewed the applications submitted by various local tax districts through the county boards of education, the State Treasurer was authorized to borrow \$300,000.00 under the provisions of the section mentioned. All notes bear interest at the rate of six per cent (6); one-fifth of the principal is repaid annually, with interest at the above rate on all the outstanding principal remaining unpaid. Below is given a detailed statement of the loans amounting to \$297,175.00 made by the State Board of Education from this fund to the various county boards of education named below:

County	Dis- trict	Township	School	Amount	Total

TABLE XXII. RECORD OF THE APPORTIONMENT TO COUNTIES FROM THE STATE PUBLIC SCHOOL FUND FOR THE YEAR BEGINNING JULY 1, 1920, AND ENDING JUNE 30, 1921

Following will be found a detailed statement showing the amounts apportioned to the several counties for the maintenance of the public schools. This apportionment was arrived at as follows: Each county board of education was required to submit in accordance with the law a budget showing by districts the names of teachers, certificates and salaries, etc. Each budget was carefully checked, the certificate of each teacher verified by the records in the office of the State Board, and the salary to which the certificate entitled each teacher under the law determined. The total for the county, or city, of all salaries thus determined was used as the basis of apportionment. Each county and city was apportioned funds sufficient to pay these adjusted salaries for three months, and in addition one-half of the salary of each county superintendent and one-third of the salary of each city superintendent.

Equalizing Fund.—It appeared from the budgets that, after levying the maximum authorized tax certain counties had insufficient funds to provide for a school term of three months required of every county by the law. Each of these counties was apportioned, in addition to the regular apportionment described above, an amount sufficient to cover the difference between the funds available and the amount required for its required three months term.

Explanation of Headings.—1. Counties and Cities. The county was used as the unit of apportionment, but the amount belonging to each special-charter or city school was indicated separately. Following the name of the county appears the total apportionment to the county, both rural and city; following *Rural* appears the apportionment for those schools operating strictly under the county system, and following the name of each city or special-charter school is indicated the details concerning the apportionment for that school. 2. Basis of Apportionment. The combined monthly salaries of all teachers. 3. Apportionment for Superintendents. One-half of the annual salary of each county superintendent. 4. Apportionment Three Months. Three months salaries of teachers plus apportionment for superintendents' salaries. 5. Equalizing Apportionment. The difference between the amount required to maintain the schools of the county for three months and the amount raised by the county tax levy. 6. Total Apportionment. The amount actually apportioned and paid to the county.

SCHOOLHOUSE PLANNING

IN

NORTH CAROLINA

ANNUAL REPORT

OF

JOHN J. BLAIR

Director of Schoolhouse Planning

PUBLISHED BY THE
STATE SUPERINTENDENT OF PUBLIC INSTRUCTION
RALEIGH, N. C.

INTRODUCTION

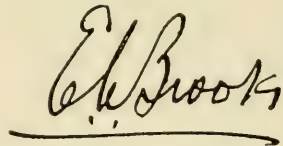

The report of Mr. John J. Blair, Director of Schoolhouse Planning, gives valuable information, not only to school officials, but to all patrons who are interested in erecting or improving school buildings. The interest of the entire public in providing better accommodations for their children is phenomenal. As the report shows, people are engaged in the construction of buildings which, when completed, will cost over twenty-five million dollars. In 1919 the total valuation of all the public school property in the State was barely fifteen million dollars. The old log schoolhouses and the small frame buildings heretofore used are rapidly disappearing, and the people of the rural communities have an enthusiasm for education that even the towns and cities did not have ten years ago. In place of the poorly lighted, poorly equipped schoolhouses may be found today, located on the great highways that are spanning the State, eight-, twelve-, or sixteen-room brick buildings with auditoriums.

The report shows that during the past generation the entire school plant has been built and then rebuilt a second time. It is necessary, therefore, in order to avoid waste, to build permanently, and this is the idea that the people seem to have in mind. Committeemen and boards of education are showing better judgment than ever before in the selection of sites for their new school buildings. They are securing sufficient grounds to provide recreation and playground centers for the children, and one of the most noticeable evidences of progress is the care with which buildings are being located.

The new building erected at Cooleemee, Davie County, is presented in the report as a type or model for interested citizens to study. It is very clear that the chief purpose of a school building is to provide classroom space for pupils, and all other parts of the building are necessarily related to the classroom. Therefore, if one building is so constructed that only 50 per cent of the floor space can be used for classroom purposes, while another devotes 75 per cent to classroom purposes, the cost of the building per classroom will be 50 per cent more in the former instance than in the latter. It is very clear that from 25 to 50 per cent of the cost of a building may be saved to the taxpayers when the people understand that the floor area may be so arranged as to provide a larger per cent of it for classroom uses rather than to have it cut up into unnecessary hallways, stairways, and rooms that cannot be used suc-

cessfully for classrooms. Of course, provision must be made for cloak-rooms and the like. But the Cooleemee building, described herein, devotes 76 per cent of the floor space to classroom uses and provides for the other necessary features of a good school building. A few buildings have been erected in which the floor space used for classroom instruction is less than 50 per cent of the entire floor space. This is such an unwise expenditure that every citizen should study the best plans in order that the greatest advantages may be derived from a fair expenditure.

The illustrations contained in this bulletin show types of buildings erected in different parts of the State which are a credit to the community as well as to the State. Teachers and other school officials are urged to study carefully schoolhouse planning in order that they may be able to give interested citizens helpful advice.

A handwritten signature in cursive script, reading "E. H. Brooks". The signature is written in dark ink and is positioned above a horizontal line that underlines the name.

Schoolhouse Planning in North Carolina

BY JOHN J. BLAIR

Director of Schoolhouse Planning

It has been my good fortune, since I became Director of Schoolhouse Planning in the State Department of Education in 1920, to visit up to December 1, 1922, ninety-six of the one hundred counties of North Carolina. Probably no one connected with the Department has immediately come in contact with more county superintendents, committeemen, and county boards than I have during this period. In attempting to respond to the requests that have poured into my office, I have been constantly on the road, and the tremendous size and extent of the State has greatly impressed me. When we consider that its mileage from East to West is as great as that from New York to Florida, and from North to South a distance of about 280 miles, it is easy to see that in order to comply with the demands of the school officials and other interested citizens who desire to improve their school plants, it has been necessary for me to be on the road practically all the time.

Just as the people have been interested in improving their agricultural status and the condition of their roads, so they have been equally as insistent that their school buildings are totally inadequate and that they must be enlarged or rebuilt altogether.

The era of schoolhouse planning really began immediately after the close of the World War, and was given irresistible momentum when the State authorized the Special Building Fund, which made it possible to lend to each county funds sufficient to provide one or more good school buildings.

The improvement in schoolhouse building and construction, and the enthusiasm over it, is not confined to any county, section, or locality, but is State-wide and universal. Boards of education and local committeemen are more and more impressed with the idea that education is the most profitable investment which the State can make. There are two phases of the subject which can not be too forcibly brought out and emphasized, namely: First, that it is not the part of wisdom to build for present needs alone. Records show that during the past generation the entire school plant has been built and then rebuilt a second time. The first period of rebuilding includes two decades from 1870-1900, a period of twenty years. From 1900-1920 the entire system, such as it was, was practically rebuilt, and at the end of this period three-fourths of the entire plant, on account of dilapidation and decay, needed to be rebuilt again.

It is easy to see that on account of having built cheaply and of cheap material at least one-half the investment was lost. The lesson which architects and school authorities must draw from this is that in the building of schoolhouses only material of a permanent and lasting nature should be employed. Experience has taught us that all coping, cornices, and facings should be of such material as will not require paint or repair. It is the wisest economy in the end to use cement, stone, and brick, instead of wood, even in the erection of buildings of smaller type.

Second. Architects and school authorities have learned that no school building should be erected which is defective in arrangement, design, lighting, heating, or ventilation, and every provision made for personal service. Also, that in the erection of all buildings, boards of education should exercise such discretion as will safeguard the planning of buildings, to the end that all schoolhouses may be erected in such a manner as to give children and teachers the best possible chance to attend school under pleasant and comfortable surroundings.

Special consideration should be shown the teacher as well as the child in the development of a school system. A teachers' home is now regarded as a very necessary part of the school plant, for here, apart from noise and disturbing agencies, she may find rest and quiet and opportunity for study which is so essential in order that she may be enabled to do her best work.

BUILDING APPROPRIATIONS IN TOWNS AND CITIES

A short review of the school building situation previous to 1920 will be appropriate and enlightening. For a period of four years from 1914-1918 almost no building was accomplished, as the price of labor and material made it practically prohibitive. High prices continued until the fall of 1920, when they again began to approach the pre-war level. In the meantime the school population had entirely outgrown its accommodations. Everywhere crowded conditions prevailed, to such an extent that churches were used, and temporary rooms, frequently of barrack construction, were built upon the school grounds; in very many instances auditoriums were divided up into classrooms by means of partitions and curtains.

To meet this emergency a number of towns and larger cities held elections for bond issues, most of which were promptly voted upon and carried. With the funds thus provided a building program of stupendous proportions was determined upon. The following cities of more than 10,000 inhabitants were enabled to proceed with their building operations:

Charlotte	Greensboro	Rocky Mount
Elizabeth City	High Point	Salisbury
Durham	New Bern	Winston-Salem
Fayetteville	Wilson	
Gastonia	Raleigh	

This, together with an expenditure on the part of Asheville and Wilmington of \$400,000 each, makes a total of \$8,000,000.

Building operations in towns of from 5,000 to 10,000 under similar conditions include the following:

Concord	Lexington	Statesville
Greenville	Mount Airy	Tarboro
Henderson	Reidsville	Thomasville
Hickory	Leaksville	Washington
Burlington	Spray	

This makes a total for towns of this class of \$1,545,000.

Building projects of splendid proportions were carried on in thirty towns of from 3,000 to 5,000 inhabitants, as follows:

Albemarle	Lincolnton	Rockingham
Canton	Lumberton	Sanford
Dunn	Marion	Shelby
Elkin	Monroe	Smithfield
Graham	Mooresville	Spencer
Hamlet	Morganton	Wadesboro
Kings Mountain	Newton	Belmont
Laurinburg	Oxford	Forest City
Lenoir	Roanoke Rapids	Morehead City

This makes a total for towns of this class of \$1,479,000.

SUMMARY OF LOAN FUND AND BUILDING OPERATIONS

During the past two years counties, cities, towns, and rural districts have been reorganizing their school systems and making preparation for sufficient school buildings to house all the children that may attend, and provide better facilities for classroom instruction. According to the figures received in the office of the State Superintendent of Public Instruction, the total cost of school buildings, which have been erected or which are now planned to be erected and for which money has been secured, is \$25,067,043.58. It is interesting to see what the loans from the Special Building Fund have helped to accomplish.

SUMMARY ALL COUNTIES

Total cost of buildings under construction.....	\$ 9,257,965.58	
Amount of first loan already made.....		\$3,236,450.00
Buildings under construction.....	4,784,480.00	
Additional loans applied for.....		2,571,820.00
Loan Fund account for all building activities for all counties	\$14,042,445.58	\$5,808,270.00

The total cost of building operations in cities and towns of from 3,000 to 50,000 population, not included in the figures given above, will be \$11,264,000 when completed. This added to the total cost of buildings under construction will make the grand total \$25,067,043.58.

It is easy to see that the loans already made from the Special Building Fund amount to \$3,344,950. The remainder of the \$5,000,000 bond issue has already been sold and will be loaned within the next few weeks. But the applications already amount to \$1,000,000 more than the size of the Special Building Fund.

SPECIAL BUILDING FUND

The Special Building Fund for which provision was made by the special session of the General Assembly was apportioned among the different counties in proportion to the school population. This apportionment, together with the amounts applied for by each county and the total cost of buildings to be erected in the respective districts, is for convenience inserted here in tabulated form:

COUNTY	NAME OF SCHOOL	Cost of New Buildings	Amount of Loan

SAFEGUARDING THE CHILDREN FROM FIRE

Statistics collected over a period of time revealed the fact that one schoolhouse a day was destroyed by fire in the United States. The most notable fact regarding these fires is that with but few exceptions all of them occurred in comparatively small towns and cities. The conclusion is therefore drawn that fire-proof construction is even more necessary in smaller towns and in the open country than in cities. In small towns fire protection is either entirely absent or not prompt and effective as in cities with well organized departments.

It is unfortunate that many school boards continue the penny-wise habit of building new schools of combustible construction, on the theory that they cost less. This slight saving in the initial cost is out of all proportion to the advantages gained by spending a little more money—possibly one-fifth more—thus giving to the community a school that will not burn and at the same time is a permanent investment, with a low insurance rate and with a small expenditure for maintenance and repairs.

In view of the knowledge of loss of life and destruction of buildings, school boards that continue to build of combustible construction are failing utterly in their duty to the community and to the State. It is to the credit of most architects in the State that they are urging fire-proof or at least slow-burning construction. Buildings of this type may be seen at Morganton, Lilesville, Whiteville, Thomasville, Forest City, and many other towns of this class.

INSURANCE COMMISSIONER TO INSPECT ALL PLANS

As frequent inquiries are made as to State laws applying to new buildings, the following enactment is incorporated in this report:

6453. Commissioner to inspect State property; plans submitted. It is the duty of the Commissioner at least once in each year, or oftener, if deemed necessary, to visit, inspect, and thoroughly examine each State institution or other State property with a view to its protection from fire, as well as to the safety of its inmates or the property therein in case of fire, and call to the attention of the board or officer having the same in charge any defect noted by him or any improvement deemed necessary. No board, commission, superintendent, or other person or persons authorized and directed by law to select plans and erect buildings for the use of the State of North Carolina, or any institution thereof, or for the use of any county, city or incorporated town or school district, shall receive and approve of any plans until they are submitted to and approved by the Insurance Commissioner of the State as to the safety of the proposed building from fire, as well as the protection of the inmates in case of fire.

Rev. s. 4829; 1901, c. 710, ss. 1, 2; 1903, c. 771, s. 3; 1909, c. 880; 1919, c. 186, s. 3.

SCHOOL SITES

School committeemen and boards of education are showing fine judgment in the selection of sites for their new school buildings. In making the choice many conditions are to be considered and met.

1. It is desirable that the building be located as near the center of population as possible.

2. The geographic center must be taken into consideration also. Both of these items have to do with the distance the pupils must travel on foot or be conveyed by transportation.

3. In most instances the new schoolhouses are placed in full view of the improved highways; thus serving, by their attractive appearance and design, as an asset to the State and the county and giving to the schoolhouse the prominence and publicity which its importance deserves.

4. The beautifying of schoolgrounds fits in with the roadway and farmstead improvements, and in fact may be used as an object-lesson to their neighborhood in this respect.

5. In the open country as large an acreage as will meet the needs of the school plant is desirable. It should be borne in mind that the modern requirements of a school are more varied and wider in their scope than in times past, so that for the average combination or union school from 6 to 12 acres is deemed reasonable.

6. Subdivisions can be made and set apart upon the following basis:

- (1) Playground for small children, with equipment;
- (2) Playground for intermediate grades, with equipment;
- (3) Recreation field for high school students to include baseball, football, and track athletics;
- (4) Sections immediately in front and adjacent to the building be reserved for flowers, lawn or ornamental planting.

Through the observance of Arbor Day the grounds of many schools have been improved and beautified. In some instances the observance has been uniform, and can be wide in its scope. Not enough, however, has yet been done to make the beautifying of schoolgrounds State-wide and noteworthy. In many instances the houses and grounds are not even respectable in appearance. Our State penitentiary has finer grounds than some of our colleges and many of our village and rural schools. The tendency now is to make the schoolhouse attractive inside and out, and under no circumstances is it to be left barren and ugly. To schools which present an aspect of a refined home children will be drawn without compulsion. This work is of such great importance that the advice and active help of committeemen and patrons should be enlisted, and competent help be employed to prepare the ground and aid in doing the planting in conformity to a preconceived plan.

7. As great emphasis is being laid upon agriculture, it is almost mandatory in connection with a section to be set apart for the school garden, which is a sort of outdoor laboratory for the study of growing plants, soil, insects, weeds, etc. Such a garden supplies material for indoor nature study and develops a love for things that are beautiful

and for all growing things. Thus is a practical means supplied for teaching gardening, elementary agriculture and horticulture. Responsibility for a plot of growing vegetables and flowers has the finest kind of moral influence upon children. Emphasizing these industries in this way will make the work attractive and profitable to country children. As agriculture is the largest source of our wealth, we should not neglect to train future workers in this honorable occupation. In many counties visited by the Director the development of manufacturing and commerce has drawn many of our youths to the centers of population to such an extent that in many instances farmhouses are either occupied by indifferent tenants or wholly deserted. A check is needed to stem the tide of migration from the country to the city, and a greater consideration of rural life, its advantages, its independence, its helpfulness, must be inculcated.

GENERAL OBSERVATION

In order that committeemen who are required to assume the responsibility of building schoolhouses may follow the wisest plan in its accomplishment, a few suggestions based on experience and observation may be of value.

1. In some instances county superintendents and boards of education, encouraged to do so by local carpenters and contractors, have either changed standard plans for schoolhouses or made their own plans with a view to economizing as to cost. In the end they have gotten buildings which in most instances are poorly arranged, unattractive in appearance, and at a higher cost than a regular contractor's bid would have been, even with added cost for supervision and architect's fee.

2. I am now most heartily in favor of school authorities and superintendents employing architects to design particularly their buildings who will furnish blueprints and clear specifications, upon which intelligent bids can be invited in the regular way.

3. In all buildings of five or more rooms a low-pressure steam heating plant and a standard plumbing outfit indoors should be installed. These buildings should also be wired in accordance with the regular code. A standard type of lighting equipment should be installed, together with a pressure tank which will furnish ample supply of deep well water for drinking purposes. Drinking fountains should also be placed in the corridors and outside the building at convenient places. These features help to make a complete and practical working plant, and bring ample returns in the way of comfort, convenience, and good health.

4. Every school of this type should have a stage of ample proportions, with dressing rooms which can be used as music rooms and upon the same floor level, so that a piano can be brought readily from them upon the stage. A properly designed trough in which to install footlights should be built into the front of the stage. The stage should be

equipped with the standard type of curtains which fold from left to right and of a color which corresponds to the finish of the walls. A door should never be cut in the partition immediately in the center of the stage at the rear. It is better to have an opening at each end of this rear passageway.

5. All classroom doors should open into the classroom, and not out into the corridor. The law requires, however, that all outside doors open outward. It is found to be very desirable to place in the top panel of these doors window sashes with clear glass about 8x10 or 10x12. Large doors for the corridors and outside entrances should be furnished with this type of lighting, instead of the very large single-glass windows which have heretofore been so much in vogue. This same type of window sash is much more desirable for outside classroom lighting as well.

6. In case of unilateral lighting it is most desirable that two transoms for ventilation and light be placed above the blackboards on the side of the room opposite the lighting area. In this climate during most of the school year ventilation through open windows may be resorted to.

7. Some form of storm doors with a vestibule under a covering should be provided for all outside entrances.

8. It is wise economy to provide for all buildings either a rift pine floor or sweet gum or maple. Under no circumstances should a hard cement floor in its natural state be left for either auditorium, basement floor, classroom, or corridors. The idea that Home Economics classes can be conducted in rooms with cement floors is preposterous. In this connection, before the floor is used, a filler consisting of boiled linseed oil with a little burnt sienna to give a slight color should be used. Upon this two coatings of shellac may be applied. For a nicer type of floor Johnson's Prepared Floor Filler with wax can be used to good advantage. An application of floor oil should be made at least four times a year.

9. It is most important that all wooden cornices and copings and other forms of construction requiring painting and repair should be done away with. All these features should be of either stone, concrete, terra cotta, or some other form of permanent material.

10. Heretofore a sufficient amount of attention has not been given to the furniture and equipment necessary for the individual teacher. There should be placed in each room a regular teacher's desk, with a comfortable chair to match. A bookcase in which the teacher's records and pupils' work can be kept should be built into the wall of the room and so designed by the architect. The dimensions of this should be at least 3 by 4 feet, with double glass doors with adequate bolts and locks. If possible, only slate blackboards should be used. When they are installed they become a permanent part of the building. They require no

liquid slating, there is no unpleasant reflection of light, so that the work can be seen from all parts of the room with ease and comfort. Nice classrooms are too frequently spoiled by installing cheap forms of blackboards which buckle and warp out of shape with changing weather conditions. A neat form of picture molding stained to match the woodwork of the room should be placed within half an inch from the ceiling around the entire room.

11. All door frames, window frames, chalk rails and other woodwork should be stained and waxed rather than painted. Wainscoting and baseboards of wood should be left off as unsightly and unsanitary.

12. Experience has shown that all folding doors employed to "throw rooms together" are at all times most unsatisfactory, and sooner or later become a menace.

13. If an underpinning wall could be built under every wooden schoolhouse in the State—both white and colored—this achievement alone would mark an epoch in our educational progress. A building without this protection is cold and unsightly, and in addition will not permit of the foundation planting which is desired.

14. FLOORS. Under no circumstance should old-field pine floors be put down in any building, as they soon wear, splinter up, become unsightly, and are difficult to keep clean after being used. Sweet gum or rift pine floors are easily kept clean and always improve the appearance of the classroom, besides being much more sanitary.

15. ROOF. A good form of roofing for school buildings is the modern asbestos shingle, either of green or red color. The red, however, should never be used in connection with red brick. Usually the green roof appears to good advantage under all circumstances. For a flat roof the Barrett Specification Process has been proven to be durable and satisfactory.

16. DESIGN. In the rolling and hilly country, the sloping roof certainly fits into the environment better and causes the building to present a more pleasing appearance; while in the eastern section, where landscapes are level, a flat roof and horizontal form of construction is appropriate.

As a rule, wooden columns in front are expensive and frequently not in keeping with the simple architecture of the building itself. If these columns are all wood, great expense will be incurred in keeping them painted and in repair. It is recommended that wooden cornices and elevated wooden boxing under the eaves be avoided, as the expense of painting and repairs is very great, and if neglected it causes the building to take on a neglected and unkempt look. In this climate a one-story type of building for primary and grammar schools particularly is highly desirable. The cost of construction is but very little more even up to a building which includes as many as eight or ten rooms, with an auditorium.

17. In schools in the open country there is no reason why forms of lighting, drinking fountains, etc., should not be installed. If an electric current is available, a two-horse power motor, costing \$100 or less, together with a pressure tank, affords an excellent system for steam heating, drinking fountains, lavatories, etc. The cost of the entire outfit for an eight-room building need not exceed \$600. It is recommended that cloak closets be arranged for in every schoolroom by placing a small partition at one end with a narrow window on the outside for lighting and two entrances, one at the right and one at the left, without doors. This form gives good ventilation and ample space for entrance and exit, and also affords heating and a reasonable amount of ventilation, which is necessary.

18. The lighting should be from windows grouped as much as possible and also placed well up toward the top of the ceiling, so that the light comes rather from above than on a level with the eye. The lighting area should be at least one-fifth of the floor area; that is, if the room is 20x30 feet with a floor area of 600 square feet, the window area should be at least 120 square feet, or 6x20 feet. The group of windows should be placed toward the rear of the room rather than toward the front; that is, at least 5 or 6 feet of wall space should remain between the first window and the front of the room. The teacher's desk can always be placed so that the light will enter from the left and rear.

19. THE VALUE OF BASEMENT ROOM. Basement rooms afford a place for recreation, and as a refuge in bad weather can not be overestimated. At recess time pupils should be required to leave the schoolrooms, and if they have room in the basement in which to spend their recesses without exposure to cold and storm, it will add wonderfully to the discipline and orderly management of the school.

20. AUDITORIUM. An auditorium of sufficient size to seat the entire school at one time and an additional space for one-third as many more people as a minimum is highly desirable. The auditorium affords opportunity for exercises in which the entire school can profitably and pleasantly take part. Chorus singing, etc., can be practiced and the pupils given an opportunity to practice recitation, debate, music and other exercises of an educational nature. The auditorium should be regarded as the center of school life and school spirit. There is always an inspiration in numbers, and an impression can be made by a speaker before a school which is assembled which can not be made in the schoolroom or in any other way. The phrase, "School and Community Center," is frequently and properly now employed for neighborhood gatherings for instruction and recreation through the visual sense, and an auditorium is a requisite feature and provision of any local educational center.

A MODEL BUILDING DESCRIBED

The committee appointed by the National Educational Association on standardization of school planning and construction adopted a scale showing the percentage of floor area which various portions of a school building should bear in their relation to the total square-foot area of the building. In thus standardizing a building it was determined that the percentage of space used for strictly instructional activities must be at least 50 per cent of the total floor area. The space thus set apart by the committee for instructional purposes includes all class and recitation rooms, commercial and business rooms, laboratories, workshop and drawing-rooms, home economics and agriculture, assembly hall, stage and gymnasium. The remaining 50 per cent of floor space is devoted to stairs and corridors, walls and partitions, administration, lavatories, closets, flues, etc. It is understood, of course, that this system of percentages can not be applied properly to small buildings of fewer than eight or ten rooms.

The Director will discuss briefly the Cooleemee School in Davie County as a type of building which is just being completed, furnished and equipped ready for occupancy February 10. This building is of the one-story type, of brick construction and situated in a beautiful grove of pines, comprising a site of eight acres in extent, facing the main highway and the village. The school will be permitted to use as an athletic and recreation field the enclosed town baseball park, the entrance to which is only 300 feet away from the building. Dressing-rooms and shower baths are provided for use of the town athletic teams as well as those of the school.

The spacious auditorium with a seating capacity of 1,000 is intended to serve the entire community as a meeting place for lectures, chautauquas, motion pictures, and other forms of educational entertainment.

The sixteen recitation rooms are of standard size, with ample cloak closets, and all lighted from an east and west exposure, the light area in every instance being equal to more than one-fifth of the floor area, which meets the standard requirement. Slate blackboards of the best quality are provided throughout. The stage serves also as a gymnasium, the dimensions of which are 38x60 feet. The floors of all rooms and corridors are of an excellent quality of rift pine, which adds much to the artistic appearance of the building. All ceilings are of an old ivory tint and walls of a light tan. The picture molding and woodwork are tinted with a dull-finish weathered oak stain, which gives the interior a most pleasing and restful effect.

As a guide for those who contemplate building, a detailed summary of statistics follows:

Total area of office and library.....	800 square feet
Total area of ground covered by building....	18,904 square feet
Total area of all floors and basement (inside measurement)	24,323 square feet
Total area taken up by 300 running feet of partitions	200 square feet
Total area used for instructional purposes....	18,584 square feet
Total area of corridors.....	3,153 square feet
Total classroom area.....	10,752 square feet
Total area auditorium and balcony.....	5,200 square feet
Total area of gymnasium.....	2,280 square feet
Total area of boiler and fuel room.....	1,410 square feet
Total area of lavatories and toilets.....	996 square feet
Total area of boys' play and recreation room..	1,200 square feet
Total area of girls' play and recreation room..	1,440 square feet
Cubic contents of building.....	332,224 cubic feet
Cost of building.....	\$60,000
Cost per cubic foot.....	18 cents
Percentage of instructional area to total inside floor area	76 per cent

There is installed in the basement of the building a modern low-pressure steam heating plant of adequate size, the cost of which is included in the above estimate. Other basement excavations furnish space for lavatories, shower baths, and playrooms, which can be used as places of refuge by pupils in cold or inclement weather.

The Director has taken this building as a type on account of its being of good design, first-class workmanship in construction, absolute safety from fire or panic, economical as to cost, convenience and accessibility of classrooms with respect to auditorium, gymnasium, library, and principal's office.

All these items together with the ideal location and artistic surroundings, make it well nigh a model school and worthy of inspection and study by boards of education, committeemen and superintendents who have a building program in contemplation.

A TYPICAL BUILDING

Unusually fine progress has been made in carrying into effect a State-wide building program. Heretofore schoolhouse building in the State has been more or less spasmodic and sporadic.

Recently both county and city superintendents have been making a special study of schoolhouse planning and building, with the result that now a certain standard with reference to design, arrangement of rooms, heating and lighting are almost universally recognized and adopted.

It will not be out of place to introduce here an example of recognized standard of schoolhouse scoring, which is now in vogue throughout the whole United States. It will be helpful to those who are unfamiliar with it, in the way of calling attention of school boards and superin-

tendents to the infinite number of vital points to be considered in order to realize the best results.

The Director will take a building which he has in mind which was finished and occupied at the beginning of the current year. This building may be taken as a type of a large class, possibly one of fifty, built in a small town of 2,300 people, but intended to serve the entire township. The old building, which has been in service for more than a quarter of a century, is of brick construction and lacking in almost every feature which is conducive to comfort and convenience and sanitation, in all of which features the new building notably excels. As evidence of faulty construction, the walls of the old building showed open cracks and seams suggesting evidence of a possible collapse. The stairs were so constructed and installed as to mean almost a certain fatality in case of a panic caused from fire, storm, lightning, or any other unusual occurrence. The grading or scoring of this building would show it to be from 40 to 50 per cent defective and deficient for school use. If detailed statistics relative to this building were given, the contrast with the new would be most startling and impressive. It will be noted that there appears upon the score card eighty-six different items for features which enter into the construction of a house planned and designed for practical use, permanency, economy of cost, and pleasing appearance.

It will be seen from the high scoring accorded this building that it is well designed and, although of practically three stories in height, of excellent proportion as to its length and elevation. The orientation is such that every room receives a certain amount of sunlight at some time during the day. The grouping of windows and the light area assures the proper amount of light, equally distributed, for classrooms, corridors, and offices, the proportion of the light area being greater in the classrooms than one-fifth the floor area, which meets the recognized requirement. The stair arrangement meets the State law in every particular, so as to afford a rapid and easy means of entrance and exit as well as serving as a fire-escape. The interior finish of woodwork is of weathered oak stain, which gives the appearance of a refined home, instead of a mill or warehouse. The authorities have realized that a good floor means much to the interior finish, appearance, and sanitary condition of the building, and so have provided a floor of maple, which has been beautifully polished and found to be comparatively inexpensive. There are twenty-two standard size classrooms in this building, and an auditorium of splendid proportions, which will serve as a community center and a gathering place for chautauquas, theatricals, motion pictures, and other forms of instruction and entertainment.

It will be found that a school of this size will be an economical proposition on account of janitor service, fuel, and other expense of operation.

A TYPICAL SCHOOL SITE

In addition to the completeness and permanence of the building itself, it could not fill the place which it does in the life of the community with a different location and environment. These qualifications, according as they are possessed in different degrees, so impress the human mind that the effect is either depressing or inspiring. In this instance there is obtained a wonderful distant view of landscape, filling almost a half-circle of the horizon and changing with the varying aspect of sky and clouds. A fringe of pines and hardwood trees furnishes a background for the setting of the building and at the same time gives the children's playground protection in winter from the north wind. The Woman's Club have already taken steps toward further beautifying the grounds in accordance with a definite plan.

In the selecting of a school site distance does not now enter into the question as it once did, for with modern means of transportation, such as the automobile and popular use by children of the bicycle as a means of locomotion, together with improved roads and sidewalks, it is not at all unusual to find a new building located entirely outside the village, town or city limits. The patrons realize that it is better to provide ample grounds for recreation and other forms of school activities than to have it near their front doors, but in a restricted area with streets and highways for playgrounds and drugstores and shops as places of

rendezvous. A building situated as this one above described within sight of one of the State's great highways can not fail to make a favorable impression upon the stranger who chances to pass that way. Thus it becomes a valuable asset, not only to the town and county, but to the State as well.

It is such undertakings as this, carried to a successful conclusion, that will give our State the pleasant sort of publicity for progress in school building that she already has for road building, agriculture, and manufacturing.

The Director could name numerous sites which have recently been secured and chosen by boards of education admirably situated and of ample area for all school activities. Not infrequently there has been acquired as much as twelve or fifteen acres and seldom less than five or six acres. As a rule, the land owners are glad to coöperate with boards of education in disposing of their land at a reasonable price, and in a number of instances the entire tract is donated free of cost. It has seldom been necessary for boards of education to have to resort to condemnation proceedings.

It means much to any community to have reclaimed, beautified, and set apart a large area of land to be maintained and preserved as a park and recreation ground for future generations. Too much praise can not be given Women's Clubs and Parent-Teachers' Associations for the interest which they have taken in this work and also in the interior decoration and equipment of those modern buildings.

VALUE OF A DEFINITE PROGRAM

Every town, city and county should adopt a well defined building program, so that, even in case of a complete change in the personnel of the school board, all future building operations can proceed in an orderly and systematic manner in accordance with a well defined plan.

Thus, such blunders as placing two or more buildings in the same lot, the extension of streets and town limits, without providing for school sites, and other grave mistakes, will be avoided. By this plan new sites will be selected by the board with a view to conditions which will prevail at least five years in advance, bearing in mind that with the natural growth of population, land values will advance and open areas suitable for school purposes and convenient to the centers of population will be more and more difficult to secure.

As one-sixth of our entire population is in school, the welfare of a large percentage of our future citizenship depends upon the adoption of a wise program of school planning. In this matter the municipality and school interests are so closely allied that they should go hand in hand.

ANNUAL REPORTS

OF THE

State Supervisor of Public High Schools

OF

NORTH CAROLINA

FOR THE

SCHOLASTIC YEARS ENDING JUNE 30
1920, 1921, AND 1922

BY

J. HENRY HIGHSMITH
State Supervisor of Public Schools

PUBLISHED BY THE
STATE SUPERINTENDENT OF PUBLIC INSTRUCTION
RALEIGH, N. C.

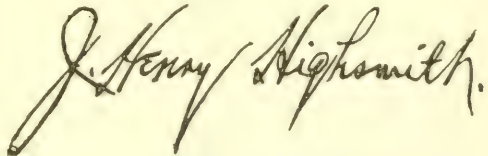

LETTER OF TRANSMITTAL

MR. A. T. ALLEN,
Superintendent of Public Instruction,
Raleigh, N. C.

MY DEAR MR. ALLEN:

The Annual Report of the High School Inspector has not been printed separately since 1919, when the Twelfth Annual Report was published. The reports for 1919-20, 1920-21, and 1921-22 are enclosed herewith for publication. These constitute, therefore, the Thirteenth, Fourteenth, and Fifteenth Annual Reports of the High School Inspector. For the sake of convenience and to lessen expense the three reports are printed in one volume. The essential facts relative to the high school situation are given for the various years.

Sincerely yours,

A handwritten signature in cursive script that reads "J. Henry Highsmith". The signature is written in dark ink and is positioned above the typed name.

Supervisor of High Schools.

RALEIGH, February 13, 1924.

THE HIGH SCHOOL SITUATION, 1919-1920

There has been much progress in the development of our high schools during the past decade, but an analysis of the present situation reveals the fact that much remains to be done.

The tables given in this report were taken from the annual reports of 420 public high schools, (white), giving one or more years of high school work. The total number of pupils enrolled was 29,294, the largest enrollment in the history of the State. While this is significant, a study of the enrollment by years reveals the fact that there is decided elimination of pupils from the schools during the first and second years particularly. It may be possible to account for this elimination, but the fact remains that it is enormous and should be prevented as far as possible. The holding power of the high school should be increased.

The number of graduates indicates that ten per cent of those enrolled in high school completed the course. This percentage should be higher, but the fact that enrollment in institutions of higher learning is increasing so rapidly is a tribute to the effectiveness of our high schools in training boys and girls to meet college entrance requirements.

The number of high schools per county ranges all the way from one each in Graham and Brunswick to 19 in Buncombe and 20 in Mecklenburg.

There is great need for consolidation of schools in order that a few strong, centrally located high schools may be developed in each county. For example, there are 14 schools in Rowan attempting high school work, and 12 in Davidson, 11 in Johnston and 13 in Guilford. More satisfactory results could be secured if the smaller schools were consolidated and the pupils transported.

There is growing interest in the matter of standard or accredited schools.

There are 147 accredited high schools in the State. Of these schools, 141 are white schools, 6 are colored, 102 urban, 45 rural; 116 public, and 31 private.

An accredited school is one that meets the following requirements:

1. Three whole-time teachers, holding proper class of certificates.
2. Four-year course of study.
3. Term at least 160 days.
4. Recitation periods 45 minutes in length.
5. Laboratory facilities for the teaching of science.
6. Library facilities.
7. Fifteen units required for graduation.
8. Forty-five pupils in average daily attendance.

The following counties have no standard public high schools: Alexander, Ashe, Avery, Bladen, Brunswick, Camden, Carteret, Caswell, Currituck, Dare, Davie, Gates, Graham, Greene, Harnett, Hertford, Hyde, Jones, Madison, McDowell, Mitchell, Montgomery, Onslow, Pamlico, Perquimans, Stokes, Transylvania, Washington, Yadin, Yancey.

There should be, at least, one public high school of standard grade in every county in the State. The action of the General Assembly at its special session in August, making available a fund for assisting in establishing standard high schools, will greatly facilitate this work.

From the facts given it is very manifest that a good deal of the high school work is not of the character that it should be because no one teacher ought to undertake to give four years of high school work. In fact in order to do satisfactory work three teachers should be employed in schools offering four years of high school work and a four year course should never be offered unless the school has, at least, two whole time teachers. Even then a four year course cannot be given unless provision is made for alternation of subjects.

Some of the outstanding features of the present situation should be noted. The great need of all of our high schools is a sufficient amount of money. High school instruction is more costly than instruction in elementary schools and the high schools of the State should be subsidized or the appropriations increased in some way. An enormous amount of money is needed for buildings and equipment. There are very few high schools in the State that are at all adequately equipped. This is not a criticism, it is simply a statement of facts and the only way to remedy the situation is to get and spend the necessary amount of money. The source of this money for high schools, as in all other cases, is the property of the folks, and the method of securing it is taxation. We need to understand this and to provide more liberally for our high schools.

In the next place, the high school course of study should be changed. There is too great insistence upon traditional subjects. A great many schools still require each student to take Latin, and will allow no substitution therefor. This is wrong. Such a subject as Latin ought to be offered to everybody, but required of nobody. The high school course of study in a great many instances needs to be enriched and made more elastic. There is great need for the teaching of science in the high schools. Science teachers are needed. To supply this need, an arrangement is being made with directors of summer schools for special work in general science during the summer of 1921. It will be possible for a high school teacher to go to a summer school and spend the entire six weeks on general science,

doing text-book work and laboratory work together with some discussion of methods of teaching science. A teacher who has had good general academic training will be able to secure such mastery of general science as will enable her to do effective work in teaching this subject.

A constant need is well trained teachers for our high schools. The institutions of higher education are not turning out a sufficient number of well trained men and women to become teachers in our high schools and every effort possible should be made to make it attractive for strong young men and women to become teachers in the high schools of the State. Our obligation, then, is:

1. Adequate support for our high schools.
2. Well trained teachers.
3. Consolidation of schools and transportation of pupils.
4. A broader course of study. Minimizing the classics and an emphasis upon science.
5. Better buildings and better equipment.
6. At least one standard high school in every county in North Carolina.

FACTS RELATIVE TO THE HIGH SCHOOL SITUATION 1920-1921

The General Assembly of North Carolina at the extra session in 1920 and the regular session in 1921 enacted laws that vitally affect the high schools of the State. High schools are now recognized as a vital, integral, organic part of the public school system. The legislation affecting high schools may be stated as follows:

1. The salaries of high school teachers will be provided as the salaries of all other public school teachers, the State schedule furnishing the basis for these salaries. (See "An Act to Provide Revenue for the Public Schools for Six Months for Teacher Training and Administration.")

2. In a great many districts high school work has been retarded because of the lack of adequate facilities. The high school will share in the benefits of the legislation providing for a special building fund. (See "An Act to Provide a Special Building Fund to be Loaned to County Boards of Education to Aid in Erecting Schoolhouses.")

3. The high school is affected by the law relating to vocational education. For the provision of this act see section 5394 of the School Law, entitled "Amended Sections of the Law Relating to Vocational Education."

4. The most significant legislation with reference to high schools is section 13 of the "Act to Provide Revenue for the Public Schools for Six Months." The section reads as follows:

SECTION 13. There shall be appropriated annually from the State Public School Fund the sum of \$224,000 for the encouragement of vocational education, and for the building of standard high schools in the rural districts, and providing teacher training courses in public high schools. So much of this amount as may be necessary shall be used by the State Board for Vocational Education to meet the Federal appropriation under the Smith-Hughes Act for the encouragement of vocational education and for the rehabilitation of persons injured in industries or otherwise. The State Board of Education is hereby authorized to spend the remainder in aiding the establishment in rural districts of consolidated schools containing high schools. The preference shall be given first to those counties having no standard high school, and second to those counties having no standard high school in the rural districts: *Provided*, that no part of this fund shall be used in any school unit containing less than five teachers, nor in districts having a special local tax rate voted by the people less than the average rate voted in the State, in addition to the State and county school tax for the six months school term, nor in any district containing a town of more than 1,500 inhabitants, unless the number of children living in the rural district attending school shall exceed the number attending from within the incorporated limits of said town.

It is estimated that relatively \$75,000 of this fund will be available for high schools. It is the purpose of the Department of Public Instruction to apply this fund as stated in the law for the establishment and maintenance of standard high schools in the thirty or more counties that have no standard schools at the present time. It will be the purpose of the State Department to use this money in sufficiently large amounts to make it really effective in securing a high grade of institutions and therefore of instruction, rather than to spend it in small amounts upon a larger number of schools.

Attention is called to the following conditions upon which this fund of \$224,000 will be administered, or so much of it as will be devoted to high schools:

1. The school unit must have at least five teachers. As a rule, however, it will require a school employing seven or more teachers and having an enrollment of not fewer than 250 pupils.
2. The school district must have a special tax rate of approximately thirty cents (.30), as that is about the average rate voted in the State.
3. Appropriations will be made only to schools in the rural districts or in towns of not more than 1,500 inhabitants, unless the number of children living in the rural district attending school shall exceed the number attending within incorporated limits of any town.
4. In order to secure appropriations from this fund it will be necessary in most cases for small schools to be consolidated in order to create a school unit of sufficient size.

RULES AND REGULATIONS GOVERNING PUBLIC HIGH SCHOOLS

The State Superintendent of Public Instruction and the State High School Inspector have worked out the following plans providing for high school instruction under North Carolina's New Six Months School Law. Both superintendents and high school principals are requested to study these plans with reference to their application to their respective schools.

High School Instruction in Non-standard Schools

1. No school shall be recognized as competent to sustain a high school department, unless it is maintained for at least eight months.
2. There must be at least twenty pupils in average daily attendance in grades above the seventh, or elementary school, for a school to be recognized as a high school.
3. There must be at least five teachers in the school unit, at least one of whom must devote his whole time to distinctively high school work.
4. A holder of a High School Teachers' Certificate of Class A may be principal of a non-standard high school.

5. A school may employ two high school teachers if there are thirty pupils in average daily attendance in the high school.

6. A third high school teacher will be allowed when the number of high school pupils in daily attendance for the year is forty-five or more; provided the number of pupils in the fourth year high school course is sufficient to justify it, and the building and equipment are adequate to the needs of such school.

Courses of Study

The former policy with regard to the high school program of studies will be continued. There will be no prescribed curriculum for all high schools to follow. Local school authorities will have ample freedom to make such local adaptations in the high school curriculum as are possible with the means at hand and as they may deem wise, subject to the State's standards for accredited schools. The State Department of Public Instruction will, as in the past, issue suggested courses for the guidance and the assistance of principals and other local authorities, but there will be no rigid prescription in this matter. Any department of the high school that has heretofore been maintained at public expense may be continued.

The School Building

A complete plan for a Consolidated School, besides the regular class-rooms, should contain:

1. An auditorium with movable seats so that it can also be used as a gymnasium. The minimum size being 40x60 feet.
2. A room for nature study, biology and agriculture to be known as a General Science Room.
3. A room for domestic science and sewing to be known as a Home Economics Room.
4. A room where skill and practice in the use of tools can be given, repair work done, etc., to be known as a Shop Work Room.
5. A Library Room with reading table on which books can be placed.
6. A teachers' rest room which may be used also as a Medical Inspection Room.
7. A Principal's Office.

Records and Reports

All public high schools will be required to keep complete records and to make the "preliminary" and "annual" reports of their work, as heretofore required, on forms to be furnished by the State Department of Public Instruction.

Inspection

All public high schools will be subject to inspection at any time by the Department of Public Instruction. In this matter the policy of the department will continue to be, as it has been in the past, one of sympathetic coöperation, stimulation, and suggestion.

The Classification of High Schools

There are two groups of standard high schools in North Carolina. Group I—Class A and Class B, and Group II—Class A and Class B. Group II—Class B is the lowest standard or accredited school. The standards for these groups are set forth as follows:

GROUP I—CLASS A.

1. Four-year course of study.
2. Length of term—nine months, or 180 days, exclusive of holidays.
3. Number of teachers—four teachers of academic subjects and two teachers of vocational subjects—a total of six teachers.
4. Length of recitation periods—at least forty minutes.
5. Fifteen units required for graduation.
6. Laboratory facilities for the teaching of Science.
7. Library of not fewer than 500 volumes.

GROUP I—CLASS B.

1. Four-year course of study.
2. Length of term—nine months, or 180 days, exclusive of holidays.
3. Number of teachers—four whole-time teachers, one of whom may be a teacher of vocational subjects.
4. Length of recitation periods—at least forty minutes.
5. Fifteen units required for graduation.
6. Laboratory facilities for the teaching of Science.
7. Library of not fewer than 500 volumes.

GROUP II—CLASS A.

1. Four-year course of study.
2. Length of term—eight months, or 160 days, exclusive of holidays.
3. Four whole-time teachers, one of whom may be a teacher of vocational subjects.
4. Length of recitation periods—at least forty-five minutes.
5. Fifteen units required for graduation.
6. Laboratory facilities for the teaching of Science.
7. Library of not fewer than 300 volumes.

GROUP II—CLASS B.

1. Four-year course of study.
2. Length of term—eight months, or 160 days, exclusive of holidays.
3. Three whole-time teachers.
4. Length of recitation periods—at least forty-five minutes.
5. Fifteen units required for graduation.
6. Laboratory facilities for the teaching of Science.
7. Library of not fewer than 300 volumes.
8. At least forty-five pupils in average daily attendance.

CLASSIFICATION OF HIGH SCHOOLS (1920-1921)

There is given below a classification of all the high schools in the State, according to the requirements as set forth above. This is the first time that such a classification has been printed in a report of the high school supervisor.

GROUP I—CLASS A.

<i>School</i>	<i>Place</i>	<i>County</i>

HIGH SCHOOL ORGANIZATION, 1921-22

There has been steady development in the field of Secondary Education in this State since 1907. There are more boys and girls in the high schools today than ever before. A larger number of high school graduates went to college last year than ever before in the history of the State. In our program of training for citizenship in a democracy high school education assumes an increasingly important role. It is necessary, therefore, that the high school become the best possible agency for the training of the future citizens of the State and Nation. To this end high schools should be so organized that the most effective work possible may be done. Some persons have had the notion, no doubt, that a teacher with indifferent equipment and a handful of students, without definite classification, pursuing one or more of the traditional high school subjects, constituted a high school. This, however, is not the conception of a high school which should be entertained today. In order to do effective high school work there must be well trained teachers, properly prepared and classified pupils, adequate school room space and equipment, and the necessary amount of money to maintain the school.

In an attempt to improve the work in high schools further classification is deemed advisable. The schools will be classified, therefore, as follows:

- I. RECOGNIZED
- II. CERTIFIED
- III. STANDARD OR ACCREDITED

I. RECOGNIZED. A RECOGNIZED school is one that meets the following requirements:

1. Two year course of study beyond the seventh grade. That is, the work of the 8th and 9th grades, or the first and second years of high school.

2. A term of eight months or 160 days, exclusive of holidays.

3. One whole-time high school teacher, holding proper certificate.

4. Recitation periods at least forty-five minutes in length that each course may be 120 clock hours, or one unit of work.

5. Eight units required for the completion of the course.

6. A library of not fewer than 100 volumes. (See bulletin 33, High School Library.)

7. At least twenty pupils in average daily attendance.

The time element in a RECOGNIZED school is the same as that in standard or accredited schools. This is necessary in order that a

student may do such work as will be recognized at face value when the work of the last two years is undertaken. A student can go from a RECOGNIZED school to the next higher class, namely, CERTIFIED and get credit for two years of work and complete the course in a CERTIFIED school in one year. Or a student may go from a RECOGNIZED school to a STANDARD school and complete the course in two years and receive all the benefits of graduation from a standard school. One teacher gives whole time to instruction. It is pretty clear that one teacher cannot do satisfactorily more than two years of work when there are twenty pupils in average daily attendance and only then by such alternation of subjects as is indicated in the Course of Study.

II. CERTIFIED. A CERTIFIED High School is one that meets the following requirements:

1. Three years of work beyond the seventh grade. That is, the eighth, ninth, and tenth grades, or first, second and third years of high school.
2. A term of thirty-two weeks or 160 days, exclusive of holidays.
3. Two whole-time high school teachers, holding proper certificates.
4. Recitation periods at least forty-five minutes in length in order that each course may be 120 clock hours, or one unit of work.
5. Twelve units of work required for completion of the course.
6. Laboratory facilities for the teaching of General Science at least.
7. A library of not fewer than 200 volumes. (See bulletin 33, High School Library.)
8. At least thirty pupils in average daily attendance.

The length of term and the length of recitation periods are identical with requirements for a STANDARD school. This is done that a student may get full credit for work completed when going from a CERTIFIED to a STANDARD School. In other words a person, who has completed the work in a CERTIFIED School can graduate from a STANDARD High School in one year and receive all the benefits of graduation from a STANDARD School. By certain alternation of subjects it will be possible for two teachers to give a good three year course and lay a good foundation for any further work that the student may undertake.

III. STANDARD. The meaning of a STANDARD High School is pretty clear to the high school people of the State. By a STANDARD or ACCREDITED School of the lowest class is meant the following:

1. A four year course of study beyond the seventh grade.
2. A term of eight months or 160 days, exclusive of holidays.
3. Three whole time high school teachers, holding proper certificates.

4. Recitation periods at least forty-five minutes in length, in order that each course may be the equivalent of 120 clock hours, or one unit of work.

5. Laboratory facilities for the teaching of Science, especially General Science and Biology.

6. A library of not fewer than 300 volumes—(See bulletin 33, High School Library.)

7. Fifteen standard units required for graduation.

8. At least forty-five pupils in average daily attendance.

By proper organization and administration three teachers can give a very satisfactory course—equipping pupils for admission to college, or giving a good foundation for any work that the pupil may wish to undertake.

The purpose of all classification or standardization of all high schools is that the work may be of the largest possible benefit to the student. The one aim of the high school is preparation of boys and girls for the best sort of living and any organization or classification that contributes to the realization of that aim is highly justified.

HIGH SCHOOL STANDARDIZATION, 1921-22

Intelligent interest in the development of high schools in North Carolina is manifested in no way better than in the attention which people in general are giving to the matter of standard high schools. Parents and pupils are raising the question as to the standing of their schools. There is constant demand for a standard school that the graduates may be the recipients of such benefits as are known to go along with standardization. The emphasis upon the establishment of standard schools in this State has not been for the sake of the standard, but for the sake of the increased effectiveness which standardization secures. It is true that the standard in this State is not as high as could be desired, but the standard can be raised when a sufficient number of schools have attained the goal already set.

There are in this State 223 standard schools, public and private, urban and rural, white and colored. Of these standard schools 206 are white and 17 colored. Of the white schools 171 are public and 35 private. Of the 17 colored schools 3 are public and 14 are private.

The significance of this achievement is more clearly indicated when it is understood that a standard school of the lowest class is one that meets the following requirements:

1. A four-year course of study.
2. Length of term eight months, or 160 days, exclusive of holidays.
3. Three whole-time high school teachers, holding proper certificates.
4. Length of recitation periods at least forty-five minutes in order that each course may be 120 clock hours or a unit of work.

5. Fifteen standard units required for graduation.
6. Laboratory facilities for the teaching of Science, at least General Science and Biology.
7. A library of not fewer than 300 volumes, selected from the high school library list.
8. At least forty-five pupils in average daily attendance.

The schools which have been added to the list this year are as follows:

Graham, Taylorsville, Jefferson (Pri.) Virginia-Carolina at Grassy Creek, Altamont at Crossnore, Pantego, Windsor, Glen Alpine, Morehead City, Newton, Bonlee, Dover, Manteo, Mocksville, Warsaw, Lowes Grove, Clemmons, Kernersville, Bunn, Belmont, Creedmoor, Pomona, Dunn, Sylva, Old Fort, Cornelius, Davidson, Mount Gilead, Jackson Springs, Seaboard, Jacksonville, Richlands, Stonewall, Philadelphus, Madison, Roseboro, Mitchell Home School (Pri.) at Misenheimer, King, Walnut Cove, Almond, Apex, Fuquay Springs, Wendell, Norlina, Littleton, Pikeville, Stantonsburg, Boonville, Yancey Collegiate Institute, (Pri.) at Burnsville.

The following private schools for the children of the colored race have been accredited this year:

Joseph K. Brick School at Bricks, Albion Academy at Franklinton, Mary Potter School at Oxford, Kittrell College at Kittrell, Henderson Institute at Henderson.

SPECIAL AID FOR ESTABLISHMENT OF STANDARD HIGH SCHOOLS, 1921-1922

At the beginning of the session 1921-22 there were twenty-seven counties in the State that had no standard schools. They were as follows: Alexander, Alleghany, Ashe, Avery, Brunswick, Camden, Carteret, Caswell, Clay, Dare, Davie, Gates, Graham, Greene, Hyde, Jones, Madison, Mitchell, Onslow, Pamlico, Perquimans, Stokes, Transylvania, Tyrrell, Washington, Yadkin, Yancey.

Standard schools were established in the following counties during the year and placed upon the accredited list at the close of the session 1921-22:

Alexander—Taylorsville High School
 Ashe—Virginia-Carolina High School, Grassy Creek
 Avery—Altamont Consolidated High School, Crossnore
 Dare—Manteo High School
 Madison—Marshall High School
 Onslow—Jacksonville and Richlands High Schools
 Pamlico—Stonewall
 Stokes—Walnut Cove
 Yadkin—Boonville

In addition to the appropriation of funds for the establishment of standard schools in counties which had no standard schools, appropriations were made for the establishment of standard schools in the rural districts of certain counties. The following schools were assisted in becoming standard schools and were placed upon the list at the close of the session 1921-22:

Chatham—Bonlee High School
 Franklin—Bunn High School
 Granville—Creedmoor High School
 Swain—Almond High School

The following schools were added, but requirements for accredited rating were not met:

Lenoir—Pink Hill High School
 McDowell—Nebo High School
 Randolph—Trinity High School

The foundation was laid for the establishment of high schools in every county in the near future. The total list of appropriations, together with the amount appropriated to each school is given as follows:

<i>County</i>	<i>School</i>	<i>Amount</i>
Alexander.....	Taylorville.....	\$ 1250
Alleghany.....	Piney Creek.....	
	Sparta.....	1250
Ashe.....	Grassy Creek.....	1250
Avery.....	Avery (County-wide proposition).....	2000
Bertie.....	Mars Hill H. S.....	500

SUMMARY: PRIVATE SCHOOLS 1921-22.

	<i>Male</i>	<i>Female</i>	<i>Total</i>
Number whole time High School Teachers.....	110	121	251
Number part time High School Teachers.....	34	80	114
	Boys	Girls	Total
Enrollment.....	2,276	2,302	4,578
Average daily attendance.....	1,708	1,662	3,370
Enrollment by Grade:			
1st year.....	552	700	1,252
2d year.....	505	628	1,133
3d year.....	460	549	1,009
4th year.....	357	517	874
Average daily attendance by Grade:			
1st year.....	321	350	671
2d year.....	323	345	668
3d year.....	295	315	610
4th year.....	215	267	482
Graduates.....	289	337	626

TABLE IV—STATISTICAL REPORT, 1921-1922, PRIVATE HIGH SCHOOLS.

County—School	No. of Weeks	No. of Years	Number of Teachers						Enrollment			Average Daily Attendance			Enrollment by Grades										
			Whole time			Part time			Boys	Girls	Total	Boys	Girls	Total	1st Yr.—8th Gr.		2d Yr.—9th Gr.		Boys	Girls	Total
